QUESTION 1

The IP address 10.1.1.1 belongs to which class of IP address space?

- A. Class A
- B. Class B
- C. Class C
- D. Class D

Answer: A

QUESTION 2

For the interface ge-1/2/3.4, what does "ge" represent?

- A. SONET/SDH
- B. Gigabit Ethernet
- C. Aggregated Ethernet
- D. GRE

Answer: B

QUESTION 3

Which word starts a command to display the operational status of a Junos device?

- A. put
- B. set
- C. show
- D. get

Answer: C

QUESTION 4

Which command prompt indicates that you are in operational mode?

- A. user@router&
- B. user@router#
- C. user@router%
- D. user@router>

Answer: D

QUESTION 5

What is the decimal equivalent of 00000100?

- A. 2
- B. 4
- C. 9
- D. 12

Answer: B

QUESTION 6

What is a valid IPv6 address?

- A. 00:05:85:23:45:67
- B. 127.0.0.1
- C. 2001:0db8:3000:2215:0000:0000:aaaa:1111
- D. 49.0001.0192.0168.1001.00

Answer: C

QUESTION 7

Which simplified IPv6 address is the same as the IP address 2001:0000:1000:0000:0000:cbff:0020:0001/64?

A. 2001::1::cbff:2:0001/64B. 2001::1000::cbff:20:1/64C. 2001:0:1000::cbff:20:1/64D. 2001:0:1:0:0:cbff:2:1/64

Answer: C

QUESTION 8

What are three characteristics of UDP? (Choose three.)

- A. UDP is faster than TCP.
- B. UDP operates at the Transport Layer.
- C. UDP is connection-oriented.
- D. UDP data is sent best-effort.
- E. UDP is more reliable than TCP.

Answer: ABD

QUESTION 9

Which layer in the OSI model is responsible for translating frames into bits?

- A. Application Layer
- B. Presentation Layer
- C. Data Link Layer
- D. Physical Layer

Answer: C

QUESTION 10

Which layer in the TCP/IP model is responsible for delivering packets to their destination?

- A. Application Layer
- B. Transport Layer
- C. Internet Layer
- D. Network Access Layer

Answer: C

QUESTION 11

Why is IPv6 packet processing more effective than IPv4 packet processing?

- A. fixed header size
- B. smaller header size
- C. fewer header fields
- D. variable header size

Answer: A

QUESTION 12

A user opens a webpage that requires the transmission of packets from the Web server to the client's browser. The packets transmitted from the Web server to the client exceed the smallest MTU value on the communications path. Which two protocol functions allow this type of communication? (Choose two.)

- A. packet segmentation
- B. serialized checking
- C. packet sequencing
- D. parallel checking

Answer: AC

QUESTION 13

Which two statements are true about TCP communication? (Choose two.)

- A. The receiver acknowledges the final packet in each communications stream.
- B. The receiver adds sequencing numbers to the packets received.
- C. The sender adds sequencing numbers to the packets it sends.
- D. The receiver acknowledges each packet it receives from the sending device.

Answer: AC

QUESTION 14

Which two statements are true about optical networks? (Choose two.)

- A. SONET and SDH both use time-division multiplexing.
- B. An optical transport network system uses time-division multiplexing.
- C. SONET and SDH both use wavelength-division multiplexing.
- D. An optical transport network system uses wavelength-division multiplexing.

Answer: AD

QUESTION 15

At which layer of the OSI model does error checking occur with IPv6?

- A. Layer 2
- B. Layer 3
- C. Layer 4
- D. Layer 7

Answer: C

New VCE and PDF Exam Dumps from PassLeader

QUESTION 16

Which statement is correct regarding IPv6 addresses?

- A. An IPv6 address consists of 128 bits separated into eight 16-bit hexadecimal sections.
- B. An IPv6 address consists of 64 bits separated into four 16-bit hexadecimal sections.
- C. An IPv6 address consists of 128 bits separated into sixteen 8-bit hexadecimal sections.
- D. An IPv6 address consists of 64 bits separated into eight 8-bit hexadecimal sections.

Answer: A

QUESTION 17

Which two statements about MPLS label-switched paths (LSPs) are true? (Choose two.)

- A. LSPs are bidirectional.
- B. LSPs are unidirectional.
- C. LSPs must follow the IGP's shortest path.
- D. LSPs can follow paths other than the IGP's shortest path.

Answer: BD

QUESTION 18

What are two ways that packet fragmentation is handled differently between IPv6 and IPv4? (Choose two.)

- A. End hosts determine the path MTU for IPv6.
- B. End hosts determine the path MTU for IPv4.
- C. Packet fragmentation occurs at intermediate nodes for IPv4.
- D. Packet fragmentation occurs at intermediate nodes for IPv6.

Answer: AC

QUESTION 19

In the exhibit, there are four static routes that route traffic through different interfaces.

```
user@router> show route protocol static
inet.0: 15 destinations, 15 routes (15 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
99.0.0.0/17 *[Static/5] 00:00:11
>to 10.1.1.2 via ge-0/0/1.0
99.0.0.0/19 *[Static/5] 00:00:11
>to 10.1.2.2 via ge-0/0/2.0
99.0.0.0/24 *[Static/5] 00:00:11
>to 10.1.3.2 via ge-0/0/3.0
99.0.0.0/26 *[Static/5] 00:00:11
>to 10.1.4.2 via ge-0/0/4.0
```

Which interface does the router use if traffic is sent to the 99.0.0.1 destination?

- A. ge-0/0/1
- B. ge-0/0/2
- C. qe-0/0/3
- D. ge-0/0/4

Answer: D

QUESTION 20

In dotted decimal notation, what is the equivalent of 11010101 01000010 01111111 11000010?

A. 213.66.127.194

B. 214.66.128.195

C. 212.64.143.194

D. 213.66.111.194

Answer: A

QUESTION 21

What is the binary equivalent of 242.168.94.124?

A. 11110011 10101000 01011110 01111100

B. 11110010 10101010 01011110 01111100

C. 11110010 10101000 01011110 01111100

D. 11110010 10101000 01010110 01111100

Answer: C

QUESTION 22

What is the last usable IP address in the 218.6.0.0/17 network?

A. 218.6.125.254

B. 218.6.126.254

C. 218.6.127.254

D. 218.6.128.254

Answer: C

QUESTION 23

What is the network address for the 10.13.147.100/19 host?

A. 10.13.128.0

B. 10.13.147.0

C. 10.13.0.0

D. 10.13.100.0

Answer: A

QUESTION 24

Which two prefixes would summarize the networks shown below? (Choose two.)

192.168.1.0/24

192.168.2.0/24

192.168.3.0/24

A. 192.168.0.0/23

B. 192.168.0.0/22

C. 192.168.0.0/24

D. 192.168.0.0/21

Answer: BD

QUESTION 25

How many host addresses are available in the /28 network?

- A. 6
- B. 14
- C. 28
- D. 30

Answer: B

QUESTION 26

What are three benefits of using IPv6? (Choose three.)

- A. IPv6 supports a greater level of security by integrating features that were optional add-ons in IPv4.
- B. IPv6 reduces administrative overhead using stateless address autoconfiguration for hosts.
- C. IPv6 eliminates the need for private to public NAT using a large address pool.
- D. IPv6 provides backward compatibility with IPv4 using the Next Header field.
- E. IPv6 represents large IP addresses using dotted decimal notation.

Answer: ABC

QUESTION 27

Which statement is correct about the forwarding table?

- A. The forwarding table is stored only on the PFE.
- B. The forwarding table contains all known routes.
- C. The forwarding table is stored on both the RE and PFE.
- D. The forwarding table is stored only on the RE.

Answer: C

QUESTION 28

Which statement describes exception traffic?

- A. Exception traffic must be sent to the PFE for processing.
- B. Exception traffic enters one ingress port and is sent out multiple egress ports.
- C. Exception traffic is rate-limited on the internal link to prevent DoS attacks.
- D. Exception traffic is processed after forwarding traffic when congestion exists.

Answer: C

QUESTION 29

What are two benefits of the modular design of the Junos OS? (Choose two.)

- A. Each module uses application-specific integrated circuits (ASICs).
- B. Each module runs in its own protected memory space.
- C. Each module can be individually restarted.
- D. Each module is supported across all Junos platforms.

Answer: BC

QUESTION 30

Which statement describes the PFE?

- A. The PFE controls the RE by providing Layer 2 and Layer 3 forwarding tables.
- B. The PFE implements advanced services such as policing, stateless firewall filtering, and class of service.
- C. The PFE sends traffic to the RE for systematic packet forwarding.
- D. The PFE receives hardware and environmental status messages from the RE.

Answer: B

QUESTION 31

Which process is responsible for the routing protocols on a Junos device?

- A. rpd
- B. mgd
- C. dcd
- D. chassisd

Answer: A

QUESTION 32

Which process is responsible for the configuration of the router and all user commands on a Junos device?

- A. rpd
- B. chassisd
- C. dcd
- D. mgd

Answer: D

QUESTION 33

How does the PFE handle unicast transit traffic destined for an existing forwarding table entry?

- A. It sends the traffic through one egress port toward its destination.
- B. It sends the traffic through multiple egress ports to all available receivers.
- C. It sends the traffic through an internal link to the RE.
- D. It sends the traffic to the local system for further processing.

Answer: A

QUESTION 34

Which two design goals describe the Junos OS design? (Choose two.)

- A. clean separation of security and routing policies
- B. clean separation of control and forwarding planes
- C. modularization of multiple software processes
- D. a single hardware platform for all software applications

Answer: BC

QUESTION 35

Which two Junos platforms provide stateful firewall functionality? (Choose two.)

- A. MX Series
- B. EX Series
- C. SRX Series
- D. QFX Series

Answer: AC

QUESTION 36

What are two examples of RE exception traffic? (Choose two.)

- A. BGP updates that travel through the local router and are destined for a remote router.
- B. OSPF hello packets that are sent from a remote router and are destined for the local router.
- C. Telnet traffic that is sent from a remote host and is destined for the local router.
- D. Telnet traffic that travels through the local router and is destined for a remote end host.

Answer: BC

QUESTION 37

In the Junos OS, what handles transit traffic?

- A. Transit traffic is handled by the RE only.
- B. Transit traffic is handled by the PFE only.
- C. Transit traffic is handled by both the RE and the PFE.
- D. Transit traffic is not handled by the RE or the PFE.

Answer: B

QUESTION 38

Which statement describes transit traffic?

- A. Traffic addressed to the chassis that requires some form of special handling by the RE before it can be orwarded out an egress port.
- B. Traffic that enters an ingress port, is compared against the forwarding table, and is forwarded out an egress port.
- C. Any traffic that requires the generation of an ICMP message.
- D. Traffic that requires some form of special attention and does not pass through the device.

Answer: B

QUESTION 39

What is the central processing component of the forwarding plane?

- A. PFE
- B. RE
- C. Junos OS
- D. forwarding table

Answer: A

QUESTION 40

Which statement is correct regarding the Junos OS?

- A. The same Junos OS image is used on all Junos devices.
- B. The Junos OS provides separation between the control and forwarding planes.
- C. Each Junos OS image is based on model-specific source code.
- D. The Junos OS creates a secondary instance of the kernel to ensure redundancy.

Answer: B

QUESTION 41

What are two functions of the RE? (Choose two).

- A. to maintain routing tables
- B. to forward traffic toward its destination
- C. to manage the PFE
- D. to implement various services such as policing, stateless firewall filtering, and class of service

Answer: AC

QUESTION 42

Which statement is correct regarding exception traffic processing?

- A. Exception traffic is only handled by the PFE.
- B. Exception traffic is rate-limited across the internal link to protect the RE.
- C. Exception traffic is not prioritized during times of congestion.
- D. Exception traffic is forwarded based on forwarding table entries.

Answer: B

QUESTION 43

When using keyboard shortcuts, which single keystroke combination allows users to erase the entire current command?

- A. Ctrl + a
- B. Ctrl + e
- C. Ctrl + u
- D. Ctrl + w

Answer: C

QUESTION 44

When using keyboard shortcuts, which keystroke combination allows users to erase a single word to the left of the cursor?

- A. Ctrl + a
- B. Ctrl + e
- C. Ctrl + u
- D. Ctrl + w

Answer: D

QUESTION 45

What must you type to enter operational mode from the root@% command prompt?

- A. exit
- B. configure
- C. edit
- D. cli

Answer: D

QUESTION 46

Which two commands would you use to discard a candidate configuration? (Choose two.)

- A. rollback
- B. delete
- C. delete 0
- D. rollback 0

Answer: AD

QUESTION 47

Which two statements are true about the configure exclusive command? (Choose two.)

- A. It allows users to retain all uncommitted changes when exiting exclusive configuration mode.
- B. It allows multiple users to edit private copies of the configuration concurrently.
- C. It causes the loss of all uncommitted changes when exiting exclusive configuration mode.
- D. It excludes other users from editing the configuration.

Answer: CD

QUESTION 48

Which command will display the active configuration?

- A. user@router> show configuration
- B. user@router# show
- C. user@router> show system configuration
- D. user@router> show system commit

Answer: A

QUESTION 49

Which three commands will cause a logical interface to go administratively down after being committed? (Choose three.)

- A. shutdown
- B. deactivate
- C. disable
- D. down
- E. delete

Answer: BCE

QUESTION 50

Which command returns a list of commands in which a given keyword is used throughout the Junos hierarchies?

- A. help topic
- B. help reference
- C. help apropos
- D. help tip

Answer: C

QUESTION 51

Which three statements are true regarding the candidate configuration? (Choose three.)

- A. The candidate configuration is a temporary configuration that might become the active configuration.
- B. A candidate configuration is initially populated with the configuration currently active on the system.
- C. Changes to the candidate configuration take effect immediately.
- D. The candidate configuration becomes the active configuration after a system reboot.
- E. The configure private command allows concurrent editing of a candidate configuration by multiple users.

Answer: ABE

QUESTION 52

Referring to the exhibit, what are two differences between the active and candidate configurations? (Choose two.)

```
user@router# show | compare
[edit protocols ospf area 0.0.0.0]
- interface ge-0/0/0.0 {
- disable;
- }
[edit protocols ospf]
area 0.0.0.0 { ... }
+ area 0.0.0.1 {
+ interface ge-0/0/0.0;
+ }
```

- A. The ge-0/0/0 interface was added to the candidate configuration.
- B. Area 0 was added to the active configuration.
- C. Area 1 was added to the candidate configuration.
- D. The ge-0/0/0 interface was added to the active configuration.

Answer: AC

QUESTION 53

Which mode is used to allow only a single person to edit a configuration?

- A. configure batch
- B. configure private
- C. configure exclusive
- D. configure dynamic

Answer: C

QUESTION 54

Which information would you find using the CLI help function? (Choose two.)

- A. message of the day
- B. tip of the day
- C. explanation for specific system log error messages
- D. explanation for specific traceoptions log messages

Answer: BC

QUESTION 55

Which two statements are true of login classes? (Choose two.)

- A. Users can be members of multiple login classes.
- B. Login classes define authorization parameters for a user.
- C. There are five system-defined login classes.
- D. Login class permission flags can be overridden for certain commands.

Answer: BD

QUESTION 56

Which two statements are true regarding rescue configurations? (Choose two.)

- A. Once saved, a rescue configuration is loaded using the rollback 0 command.
- B. The rescue configuration must contain the minimal elements necessary to restore network connectivity.
- C. A minimal rescue configuration is defined by default.
- D. A rescue configuration must include a root password.

Answer: BD

QUESTION 57

Which statement is correct about the information shown in the exhibit?

Amnesiac (ttyu0)

login:

- A. The factory-default configuration is running on the device.
- B. The Junos OS was corrupted and did not boot correctly.
- C. The device was recently upgraded to a newer version of the Junos OS.
- D. The device's memory has been corrupted and no file system is present after a reboot.

Answer: A

QUESTION 58

Which two statements are true regarding the use of NTP clock synchronization? (Choose two.)

- A. The Junos OS supports client, server, and symmetric modes of NTP operation.
- B. Synchronized time on all network devices makes log messages more useful for troubleshooting.
- C. Authentication methods are not supported.
- D. The Junos OS must be used as the primary time reference.

Answer: AB

QUESTION 59

You are asked to change the cable on interface ge-2/1/3. Which statement is correct?

- A. The cable is found on FPC 1, slot 3, and port 2.
- B. The cable is found on slot 1, port 2, and FPC 3.
- C. The cable is found on port 3, FPC 2, and slot 1.
- D. The cable is found on FPC 1, slot 2, and port 3.

Answer: C

QUESTION 60

You are asked to change the cable on interface fe-4/2/3. Which statement is correct?

- A. The cable is found on port 4, FPC 2, and slot 3.
- B. The cable is found on slot 2, port 3, and FPC 4.
- C. The cable is found on FPC 4, slot 3, and port 2.
- D. The cable is found on slot 2, FPC 3, and port 4.

Answer: B

QUESTION 61

You are asked to change the cable on interface ge-0/2/1. Which statement is correct?

- A. The cable is found on slot 2, port 0, and FPC 1.
- B. The cable is found on FPC 0, slot 1, and port 2.
- C. The cable is found on port 1, slot 0, and FPC 2.
- D. The cable is found on slot 2, port 1, and FPC 0.

Answer: D

QUESTION 62

Referring to the exhibit, which two actions would you take to only apply the 10.10.12.1/24 address to the ge-0/0/1.0 interface?

```
user@router> show configuration
groups {
  ge-int {
  interfaces {
    <ge-*> {
    unit 0 {
      familyinet {
      address 10.10.12.1/24;
      }
    }
    }
}
...
interfaces {
    ge-0/0/1 {
    unit 0;
    }
}
```

ļ

- A. Apply the ge-int group to the configuration at the [edit] hierarchy.
- B. Apply the ge-int group to the configuration at the [edit interfaces ge-0/0/1] hierarchy.
- C. Apply the ge-int group to the configuration at the [edit interfaces ge-0/0/1 unit 0] hierarchy.
- D. Apply the ge-int group to the configuration at the [edit interfaces] hierarchy.

Answer: BC

QUESTION 63

Which interface type connects the control and forwarding planes on an MX Series device?

- A. fxp1
- B. fxp0
- C. me0
- D. ae1

Answer: A

QUESTION 64

Which command is used to restore a Junos device to its default state?

- A. load factory-default
- B. load override factory-default
- C. load replace-default
- D. load set-default

Answer: A

QUESTION 65

Administrators report that they are unable to access the management interface of the EX Series device shown in the exhibit.

```
{master:0}[edit interfaces]
user@switch# show
me0 {
  disable;
unit 0 {
  familyinet {
  address 10.1.1.10/24;
  }
  }
}
```

Which command will resolve this problem?

- A. delete me0 disable
- B. activate me0
- C. set me0 unit 0 enable
- D. deactivate me0

Answer: A

QUESTION 66

Which statement is true about logical units?

- A. Logical units are similar to VLANs used by other vendors.
- B. A logical unit is required for transit interfaces.
- C. Frame Relay encapsulation supports one logical unit.
- D. Link speed and duplex are configured in the logical unit properties.

Answer: B

QUESTION 67

Referring to the exhibit, which two statements are true? (Choose two.)

```
[edit system syslog]
user@router# show
host 152.170.10.10 {
any warning;
}
file changes {
change-log info;
}
```

- A. Any warning message will be sent to the 152.170.10.10 host.
- B. A warning message will be logged when the 152.170.10.10 host logs in.
- C. Changes to the device's internal temperatures will be logged.
- D. Changes to the configuration will be logged.

Answer: AD

QUESTION 68

Which command is used to load the rescue configuration?

- A. load override rescue
- B. rollback rescue
- C. load replace rescue-configuration
- D. rollback 49

Answer: B

QUESTION 69

Which two external authentication servers are supported for administrative access to a Junos device? (Choose two.)

- A. RADIUS
- B. LDAP
- C. ACE
- D. TACACS+

Answer: AD

QUESTION 70

You are investigating routing problems on a device running the Junos OS. You receive the error shown in the exhibit when you attempt to restart the routing process.

```
user@router> restart
```

unknown command.

Which statement describes the problem?

- A. You have typed an invalid command.
- B. You must be in configuration mode to restart the routing process.
- C. You do not have permission to restart the routing process.
- D. You must wait until close of business to restart the routing process, based on user-defined policy.

Answer: C

QUESTION 71

At which command prompt would you issue the set date <date> command?

- A. [edit chassis]
 user@router#
- B. [edit]
 user@router#
- C. [edit system]
 user@router#
- D. user@router>

Answer: D

QUESTION 72

You must apply the family inet configuration parameter only to Gigabit Ethernet interfaces that are in FPC 2. Which output applies to this configuration?

```
A. [edit groups]
   user@router# show
   ge-int {
   interfaces {
   < qe-*> {
   unit 0 {
   familyinet;
   }
   }
B. [edit groups]
   user@router# show
   ge-int {
   interfaces {
   <*> {
   unit 0 {
   familyinet;
   }
   }
C. [edit groups]
   user@router# show
   ge-int {
   interfaces {
```

```
<*-2/*/*> {
  unit 0 {
  familyinet;
  }
  }
}

D. [edit groups]
  user@router# show
  ge-int {
  interfaces {
  <ge-2/*> {
  unit 0 {
  familyinet;
  }
  }
}
```

Answer: D

QUESTION 73

Referring to the exhibit, you are unable to commit the configuration for the ge-0/0/1 interface.

```
[edit interfaces ge-0/0/1]
user@router# show
unit 100 {
vlan-id 100;
familyinet {
address /24;
}
}
[edit interfaces ge-0/0/1]
user@router# commit check
[edit interfaces ge-0/0/1]
'unit 100'
Only unit 0 is valid for this encapsulation
error: configuration check-out failed
```

What must you do to commit the configuration?

- A. You must set the vlan-tagging parameter under the [edit interfaces ge-0/0/1] hierarchy.
- B. You must use the rename command to change unit 100 to unit 0.
- C. You must set the encapsulation flexible-ethernet-services parameter under the [edit interfaces ge-0/0/1] hierarchy.
- D. You must set the encapsulation vlan-ccc parameter under the [edit interfaces ge-0/0/1 unit 100] hierarchy.

Answer: A

QUESTION 74

You are asked to configure the configuration archival feature on your Junos devices. Which two transfer methods are available? (Choose two.)

- A. TFTP
- B. FTP
- C. SCP
- D. SFTP

Answer: BC

QUESTION 75

Which command will resolve the problem shown in the exhibit?

user@router> show system alarms 1 alarms currently active Alarm time Class Description 2013-09-14 23:54:01 UTC Minor Rescue configuration is not set

- A. user@router> request system configuration rescue save
- B. user@router# request system configuration rescue save
- C. user@router> file copy current /config/rescue.conf
- D. user@router# file copy current /config/rescue.conf

Answer: A

QUESTION 76

Which command displays only the interfaces that are operationally and administratively up?

- A. show interfaces terse | match up
- B. show interfaces terse | match down
- C. show interfaces terse | except up
- D. show interfaces terse | except down

Answer: D

QUESTION 77

To which directory does the Junos OS write traceoptions files?

- A. /var/tmp/
- B. /var/
- C. /var/log/
- D. /var/home/<username>/

Answer: C

QUESTION 78

Which command gracefully shuts down the Junos OS?

- A. request system reboot
- B. request system logout
- C. request system halt
- D. restart gracefully

Answer: C

QUESTION 79

Which action does the ping 172.18.1.1 size 5 command perform?

- A. It sends only five ping requests to the 172.18.1.1 destination.
- B. It sends a continuous ping with a packet length of five bytes to the 172.18.1.1 destination.

- C. It sends five rapid ping requests to the 172.18.1.1 destination.
- D. It sends a continuous rapid ping with a packet length of five bytes to the 172.18.1.1 destination.

Answer: B

QUESTION 80

Which command displays the current temperature of a Junos device's components?

- A. show chassis temperature-thresholds
- B. show chassis environment
- C. show chassis hardware
- D. show chassis alarms

Answer: B

QUESTION 81

Which command would you use to view interface usage details in real time?

- A. show interfaces terse
- B. show interfaces extensive
- C. monitor interface traffic
- D. monitor traffic interface

Answer: C

QUESTION 82

What happens when you issue the ping 172.19.102.2 count 5 command?

- A. ICMP echo requests are sent to 172.19.102.2 in five-millisecond intervals.
- B. ICMP echo requests are sent to 172.19.102.2 until five packets are dropped.
- C. ICMP echo requests are sent to 172.19.102.2 five times.
- D. ICMP echo requests are sent continuously to 172.19.102.2 for five seconds.

Answer: C

QUESTION 83

You are asked to configure real-time performance monitoring (RPM) between two Junos devices to track traffic in your network. Which two application traffic types can you track? (Choose two.)

- A. ICMP
- B. SNMP
- C. TCP
- D. HTTPS

Answer: AC

QUESTION 84

You are troubleshooting a routing issue and need to check the hop-by-hop path to the 10.10.10.10 destination. Which three commands would display the path? (Choose three.)

- A. user@router# traceroute 10.10.10.10
- B. user@router> ping record-route 10.10.10.10

```
C. user@router> traceroute 10.10.10.10
D. user@router# run traceroute 10.10.10.10
E. user@router# ping record-route 10.10.10.10
```

Answer: BCD

QUESTION 85

You are asked to free up disk space so you can update your version of the Junos OS. Which two commands display the files that will be removed? (Choose two.)

```
A. user@router> request system storage cleanup
B. user@router> show system storage
C. user@router> request system storage cleanup dry-run
D. user@router> show system storage detail
```

Answer: AC

QUESTION 86

Which two commands are used during the password recovery process? (Choose two.)

- A. clear system login
- B. boot-s
- C. recovery
- D. delete system root-authentication

Answer: BC

QUESTION 87

You receive an alarm that your Junos device is experiencing problems regarding temperature. Which two commands would you use to investigate this problem? (Choose two.)

- A. show chassis hardware
- B. show chassis temperature-thresholds
- C. show chassis pic fpc-slot <value> pic-slot <value>
- D. show chassis environment

Answer: BD

QUESTION 88

You have two IP addresses configured on the ge-0/0/6 interface, as shown in the exhibit. You want to select the 172.16.10.101 address as the source address for packets sent from this interface to hosts on a remote subnet.

```
[edit interfaces ge-0/0/6]
user@router# show
{
familyinet {
  address 172.16.10.100/24;
  address 172.16.10.101/24;
}
}
```

Which parameter would you add to the 172.16.10.101 address to complete this task?

- A. preferred
- B. broadcast
- C. primary
- D. arp 172.16.10.101

Answer: A

QUESTION 89

Which routing instance type is used to facilitate filter-based forwarding?

- A. VRF
- B. FBF
- C. forwarding
- D. no-forwarding

Answer: C

QUESTION 90

Which two statements are true about static routes in the Junos OS? (Choose two.)

- A. Static routes are defined at the [edit routing-instances] hierarchy.
- B. Static routes must have a next hop defined.
- C. Static routes remain in the routing table until you remove them or until they become inactive.
- D. Static routes are learned by neighboring devices and added to their routing tables.

Answer: BC

QUESTION 91

Which configuration parameter on a Junos device alters the default next-hop resolution behavior of a static route?

- A. no-readvertise
- B. resolve
- C. preference
- D. passive

Answer: B

QUESTION 92

Which two statements are true regarding route preference? (Choose two.)

- A. Lower preference values are more preferred than higher preference values.
- B. You can modify the default preference values for any of the routing information sources.
- C. By default, a static route is more preferred than a RIP route.
- D. A static route is always preferred over a direct route.

Answer: AC

QUESTION 93

Which two statements are true regarding routing tables? (Choose two.)

- A. The routing table is populated by the forwarding table.
- B. Devices running the Junos OS can accommodate multiple routing tables.
- C. Information learned from routing protocols is stored in the routing table.
- D. The primary routing table for IPv4 unicast routes is inet.4.

Answer: BC

QUESTION 94

Which two statements are correct when you use the reject parameter as the next-hop value for a static route? (Choose two.)

- A. The packet is dropped and the packet's source is marked with the no-readvertise parameter.
- B. The system sends the packet back to the source.
- C. The packet is dropped from the network.
- D. The system sends an ICMP message back to the source of the packet.

Answer: CD

QUESTION 95

Which routing table stores IPv4 unicast routes and is used by multicast routing protocols to prevent loops?

- A. inet.0
- B. inet.1
- C. inet.2
- D. inet.3

Answer: C

QUESTION 96

Which source of routing information is preferred by default?

- A. OSPF internal
- B. OSPF external
- C. IS-IS Level 1
- D. IS-IS Level 2

Answer: A

QUESTION 97

What are two routing requirements for a device to communicate with another device? (Choose two.)

- A. end-to-end communications path
- B. hosts on the same Layer 2 broadcast domain
- C. hosts on the same Layer 3 broadcast domain
- D. routing information on participating Layer 3 devices

Answer: AD

QUESTION 98

```
inet.0: 4 destinations, 4 routes (4 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
```

```
172.23.10.0/24 *[Direct/0] 21:59:56 
>via ge-0/0/6.0 
172.23.10.100/32 *[Local/0] 22:00:10 
Local via ge-0/0/6.0 
172.23.12.0/24 *[Static/5] 00:01:36 
>to 172.23.10.1 via ge-0/0/6.0 
172.23.15.0/24 *[Static/5] 00:01:36 
>to 172.23.10.1 via ge-0/0/6.0
```

Users are unable to access resources in the 172.23.14.0/24 subnet. Referring to the exhibit, which two actions would solve this problem? (Choose two.)

- A. Configure a separate routing instance.
- B. Configure a default static route.
- C. Configure a static route to 172.23.14.0/24.
- D. Configure the existing routes to resolve the indirect next hop.

Answer: BC

QUESTION 99

What are three types of routing instances? (Choose three.)

- A. VPN
- B. virtual-router
- C. policy
- D. VRF
- E. forwarding

Answer: BDE

QUESTION 100

Which two statements describe the forwarding table in the Junos OS? (Choose two.)

- A. The forwarding table contains all known routes.
- B. The forwarding table stores a subset of information from the routing table.
- C. Junos devices use the forwarding table to compare incoming packets against existing entries to determine the next hop.
- D. If multiple matches exist, the forwarding table uses the least-specific entry to forward packets toward the destination.

Answer: BC

QUESTION 101

Assuming both paths shown in the exhibit are available, which statement is correct?

```
[edit routing-options]
user@router# show
static {
route 0.0.0.0/0 {
next-hop 10.1.1.1;
qualified-next-hop 10.1.1.254 {
preference 4;
}
}
}
```

- A. Traffic matching the default route will use 10.1.1.1 as the next hop.
- B. Traffic matching the default route will use 10.1.1.254 as the next hop.
- C. Traffic matching the default route will be load-balanced per packet across both next hops.
- D. Traffic matching the default route will be load-balanced per flow across both next hops.

Answer: B

QUESTION 102

Which command will silently drop a matching packet?

```
A. set routing-options static route 10.1.1.1/32 no-retain
B. set routing-options static route 10.1.1.1/32 discard
C. set routing-options static route 10.1.1.1/32 reject
D. set routing-options static route 10.1.1.1/32 passive
```

Answer: B

QUESTION 103

Which command will drop a matching packet and send out a notification message?

```
A. set routing-options static route 10.1.1.1/32 no-retain
B. set routing-options static route 10.1.1.1/32 discard
C. set routing-options static route 10.1.1.1/32 reject
D. set routing-options static route 10.1.1.1/32 no-install
```

Answer: C

QUESTION 104

Which command will show the best paths that are installed in the PFE?

```
A. show routeB. show route active-pathC. show route privateD. show route forwarding-table
```

Answer: D

QUESTION 105

Which command displays the egress interfaces selected on the PFE for destination prefixes?

```
A. show route forwarding-tableB. show route tableC. show route table extensiveD. show pfefwdd
```

Answer: A

QUESTION 106

Which route filter match type only matches prefixes greater than the defined prefix?

- A. exact
- B. upto
- C. longer
- D. orlonger

Answer: C

QUESTION 107

In which hierarchy are routing policies defined?

- A. [edit policy-options]
- B. [edit routing-options]
- C. [edit forwarding-options]
- D. [edit protocols]

Answer: A

QUESTION 108

What are two default routing policies on Junos devices? (Choose two.)

- A. The BGP import policy accepts all BGP routes.
- B. The BGP export policy rejects all active BGP routes.
- C. The OSPF import policy accepts all OSPF routes.
- D. The OSPF export policy accepts all active OSPF routes.

Answer: AC

QUESTION 109

Which statement is correct about policies in the Junos OS?

- A. Import policies are used to filter routes from the routing table to the forwarding table.
- B. Import policies are used to filter routes destined for the routing table.
- C. Import policies are used to filter routes being sent to neighboring devices.
- D. Import policies are used to filter traffic entering the device.

Answer: B

QUESTION 110

Which statement is correct about policies in the Junos OS?

- A. Export policies are used to filter routes from the RE forwarding table to the PFE forwarding table.
- B. Export policies are used to filter routes destined for the routing table.
- C. Export policies are used to filter routes being sent to neighboring devices.
- D. Export policies are used to filter traffic leaving the device.

Answer: C

QUESTION 111

What is the default action for firewall filters?

A. accept

- B. reject
- C. discard
- D. log

Answer: C

QUESTION 112

What is the purpose of unicast reverse path forwarding?

- A. to validate packet receipt on interfaces where the traffic should be received
- B. to forward packets out the interfaces where the traffic should be received
- C. to forward packets out the interfaces where the traffic should be sent
- D. to validate packet receipt on interfaces where the traffic should be sent

Answer: A

QUESTION 113

Which two statements are correct about firewall filters in the Junos OS? (Choose two.)

- A. Firewall filters are stateless.
- B. Firewall filters are used to control routing information that is exchanged between devices.
- C. Firewall filters are used to control traffic passing through the device.
- D. Firewall filters can only be applied to traffic entering the device.

Answer: AC

QUESTION 114

Which two firewall filter actions will terminate the processing and evaluation of a packet? (Choose two.)

- A. permit
- B. accept
- C. deny
- D. discard

Answer: BD

QUESTION 115

Which two statements are true regarding routing policy processing? (Choose two.)

- A. The Junos OS verifies the match criteria of each policy in order and performs the associated action when a match occurs.
- B. Policies are evaluated from right to left as displayed in the Junos OS configuration file.
- C. Polices are evaluated based on the order in which they are applied to a routing protocol.
- D. Policy processing stops once the last statement in the policy is evaluated.

Answer: AC

QUESTION 116

What are three firewall filter terminating actions? (Choose three.)

A. accept

- B. log
- C. reject
- D. discard
- E. drop

Answer: ACD

QUESTION 117

Which command will apply a policy to redistribute static routes into OSPF?

- A. set protocols ospf import static-routes
- B. set protocols ospf export static-routes
- C. set routing-options static defaults readvertise
- D. set routing-options static route 0.0.0.0/0 readvertise

Answer: B

QUESTION 118

Which two tasks are accomplished by the firewall filter shown in the exhibit? (Choose two.)

```
[edit firewall family inet filter input-filter]
user@router# show
term my-policy {
  from {
    source-address {
    151.43.62.0/24;
    }
  }
  then {
    count;
  }
}
term else {
  then {
    discard;
  }
}
```

- A. Traffic matching the my-policy term will be counted and accepted.
- B. Traffic matching the my-policy term will be counted and discarded.
- C. Traffic not matching the my-policy term will be discarded.
- D. Traffic not matching the my-policy term will be accepted.

Answer: AC

QUESTION 119

Which statement is correct about the policy shown in the exhibit?

```
[edit policy-options]
user@router# show
policy-statement my-policy {
term 1 {
from {
route-filter 172.27.0.0/24 longer;
}
```

```
}
then reject;
}
```

- A. All routes are accepted.
- B. All routes are rejected.
- C. A 172.27.0.0/24 route will be accepted.
- D. A 172.27.0.0/16 route will be accepted.

Answer: B

QUESTION 120

Referring to the exhibit, if the static route with prefix 10.1.1.0/24 is evaluated against the routing policy, which preference value will be set?

```
policy-options {
policy-statement example-pol {
term 1 {
from {
protocol static;
route-filter 10.1.0.0/16 exact;
then {
preference 6;
accept;
term 2 {
from {
protocol static;
route-filter 10.1.1.0/24 longer;
then {
preference 7;
accept;
term 3 {
from {
protocol static;
route-filter 10.1.0.0/16 upto /24;
then {
preference 8;
accept;
term 4 {
then accept;
}
```

- A. The preference will be 6.
- B. The preference will be 7.

- C. The preference will be 8.
- D. The preference will be the default for static routes.

Answer: C

QUESTION 121

```
[edit policy-options]
user@router# show
policy-statement block-routes {
  term 1 {
  from {
    route-filter 172.27.0.0/24 longer;
  }
  then reject;
}
term 2 {
  then accept;
}
```

You are asked to ensure that your device does not accept any prefixes within the 172.27.0.0/24 network. You have applied the policy shown in the exhibit, but the 172.27.0.0/24 route is still present on your device. Which configuration will resolve this problem?

- A. [edit policy-options policy-statement block-routes]
- B. user@router# set term 1 from route-filter 172.27.0.0/24 or longer [edit policy-options policy-statement block-routes]
- C. user@router# set term 1 from route-filter 172.27.0.0/24 up to /30
 [edit policy-options policy-statement block-routes]
- D. user@router# set term 2 from route-filter 172.27.0.0/24 or longer
 [edit policy-options policy-statement block-routes]
- E. user@router# set term 2 from route-filter 172.27.0.0/24 or longer

Answer: A

QUESTION 122

Referring to the exhibit, which three networks match the policy? (Choose three.)

```
[edit policy-options policy-statement my-policy]
user@router# show
term 1 {
from {
  route-filter 192.168.0.0/16 orlonger;
}
then accept;
}
```

- A. 192.168.0.0/16
- B. 192.168.0.0/15
- C. 192.168.65.0/24
- D. 192.167.0.0/17
- E. 192.168.24.89/32

Answer: ACE

QUESTION 123

A Telnet session is initiated from host 10.1.1.1. What will happen when it is processed by the firewall filter shown in the exhibit?

```
firewall {
filter select-telnet {
term 1 {
from {
source-address {
10.0.0.0/8;
then log;
term 2 {
from {
protocoltcp;
port telnet;
then {
syslog;
reject;
term 3 {
from {
source-address {
10.1.1.1/32;
protocoltcp;
port telnet;
then {
sample;
accept;
}
}
```

- A. The packet will be accepted and logged.
- B. The packet will be discarded and logged.
- C. The packet will be rejected and a syslog message generated.
- D. The packet will be accepted and sampled.

Answer: A

QUESTION 124

What are the usable hosts on the 192.168.1.24/29 network?

- A. .24 through .48
- B. .24 through .32
- C. .25 through .30
- D. .35 through .31

Answer: C **Explanation:**

The minimum host address is 192.168.1.25, and the maximum host address is 192.168.1.30. http://jodies.de/ipcalc?host=192.168.1.24&mask1=29&mask2=

QUESTION 125

Which two are correct when configuring an IP address for a Fast Ethernet interface? (Choose two.)

- A. set interfaces fe-0/0/0 address 10.1.1.1/24
- B. set interfaces fe-0/0/0.0 family inet address 10.1.1.1/24
- C. set interfaces fe-0/0/0.0 address 10.1.1.1/24
- D. set interfaces fe-0/0/0 unit 0 family inet address 10.1.1.1/24

Answer: BD Explanation:

http://www.juniper.net/documentation/en_US/junos12.3/topics/example/interfacesconfiguring-fast-ethernet-interfaces.html

QUESTION 126

After factory-defaults have been loaded, which two syslog files will be present in the configuration?

- A. system and chassisd
- B. syslog-messages and NVRAM
- C. messages and interactive-commands
- D. authorization and events

Answer: C **Explanation:**

http://www.juniper.net/documentation/en_US/junos14.1/topics/reference/general/ex3200-defaultconfiguration.html

QUESTION 127

Which of the following commands will configure the maximum transmission unit size of a fast ethernet interface?

- A. set interfaces fe-0/0/0 unit 0 ethernet-options mtu 1200
- B. set interfaces fe-0/0/0 mtu 1200
- C. set interfaces fe-0/0/0 unit 0 mtu 1200
- D. set interfaces fe-0/0/0.0 mtu 1200

Answer: C Explanation:

https://www.juniper.net/techpubs/en_US/release-independent/nce/informationproducts/topic-collections/nce/nce0097-small-office-for-hd-video/small-office-for-hd-video.pdf

QUESTION 128

What information does the help topic command provide?

- A. router's version and serial number to help open a case with JTAC
- B. software documentation describing features and configuration tasks within JUNOS
- C. a brief description of commands and their default values
- D. a verification of the current configuration on the router

Answer: B Explanation:

The help topic command displays usage guidelines for the statement based on information that appears in the Junos OS configuration guides.

QUESTION 129

Which two statements about subnet masks are true? (Choose two.)

- A. If a bit is turned on (1), the corresponding bit in the IP address is used for the host portion.
- B. If a bit is turned off (0), the corresponding bit in the IP address is used for the host portion.
- C. If a bit is turned on (1), the corresponding bit in the IP address is used for the network prefix.
- D. If a bit is turned off (0), the corresponding bit in the IP address is used for the network prefix.

Answer: BC Explanation:

http://www.akadia.com/services/ip routing on subnets.html

QUESTION 130

Which statement is correct about logical units on Juniper Router interfaces?

- A. Logical units are used only when a Layer 2 identifier is present such as a VLAN.
- B. A logical unit of 0 is required when using a frame-relay DLCI.
- C. A logical unit is always required.
- D. Logical units are not required unless ATM or 802.1Q VLAN tagging is configured.

Answer: C **Explanation:**

https://www.safaribooksonline.com/library/view/junos-enterpriserouting/9781449309633/ch04s03.html

QUESTION 131

Which two options are reasons for using traffic classification? (Choose two.)

- A. to use the classification to route traffic
- B. to use the classification to reorder packets from various sources
- C. to use the classification to discard malformed packets
- D. to use the classification to provide the configured service level

Answer: AD Explanation:

Classification entails using a traffic descriptor to categorize a packet within a specific group to define that packet and make it accessible for QoS handling on the network. Using packet classification, you can partition network traffic into multiple priority levels or classes of service. https://www.cisco.com/c/en/us/td/docs/ios/12_2/qos/configuration/guide/fqos_c/qcfclass.pdf

QUESTION 132

For the interface ge-1/2/3.4, what does the "ge" represent?

- A. Gigabit Ethernet
- B. SONET/SDH
- C. Aggregated Ethernet

D. GRE

Answer: A

QUESTION 133

Which word starts a command to add configuration on a Junos device?

- A. get
- B. set
- C. put
- D. show

Answer: B

QUESTION 134

Which word starts the command to remove configuration elements on a Junos device?

- A. undo
- B. remove
- C. delete
- D. unset

Answer: C

QUESTION 135

After editing to your device's configuration, which command must you enter to activate the configuration changes?

- A. set
- B. copy candidate active
- C. apply-config
- D. commit

Answer: D

QUESTION 136

What is the decimal equivalent of 00000110?

- A. 2
- B. 4
- C. 6
- D. 11

Answer: C

QUESTION 137

Which CLI mode allows you to make configuration changes?

- A. enable mode
- B. configuration mode
- C. operational mode

D. active mode

Answer: B

QUESTION 138

Which command do you use to navigate to [edit interfaces]?

- A. cd interfaces
- B. dir edit interfaces
- C. edit interfaces
- D. interfaces

Answer: C

QUESTION 139

Which command will display the contents of the forwarding table?

- A. show route forwarding-table
- B. show forwarding
- C. show configuration
- D. show interfaces

Answer: A

QUESTION 140

Which operating system do Juniper Networks MX Series routers use?

- A. IOS
- B. MX-OS
- C. UNIX
- D. Junos OS

Answer: D

QUESTION 141

Which command do you use to go from the shell prompt to the CLI prompt?

- A. run cli
- B. cli
- C. start cli
- D. edit

Answer: B

QUESTION 142

Which account is used to access a Junos device in factory-default configuration?

- A. root
- B. admin
- C. juniper
- D. user

Answer: A

QUESTION 143

Which statement is true regarding the Junos OS?

- A. Each process runs in its own protected memory space ensuring that one process cannot directly interfere with another.
- B. Processes share memory space but use separate ASICs so that one process cannot directly interfere with another.
- C. A central processor called the IP2 Chip dynamically assigns memory as process needs fluctuate.
- D. The memory management daemon (mmd) is responsible for allocating new memory for processes as they request it.

Answer: A

QUESTION 144

Which statement is true regarding the Junos OS?

- A. The Junos kernel is based on the Solaris operating system.
- B. The Junos kernel is based on the GNU Zebra operating system.
- C. The Junos kernel is completely original and not based on any other operating system.
- D. The Junos kernel is based on the FreeBSD UNIX operating system.

Answer: D

QUESTION 145

Which statement is true regarding the Junos OS?

- A. All platforms running the Junos OS use the same source code base.
- B. All platforms running the Junos OS use the same PFE.
- C. All platforms running the Junos OS use a hard drive to optimize syslog data storage.
- D. All platforms running the Junos OS use a separate process with protected memory space for each routing protocol.

Answer: A

QUESTION 146

Which statement is true regarding the Junos OS?

- A. All platforms running the Junos OS have identical factory-default configurations.
- B. All platforms running the Junos OS use the IP2 processor for longest-match lookup.
- C. All platforms running the Junos OS use the same source code base.
- D. All platforms running the Junos OS use FXP1 for communication between control and forwarding planes.

Answer: C

QUESTION 147

What are two Junos processes? (Choose two.)

- A. OSPF SPF daemon (ospfd)
- B. SNMP daemon (snmpd)
- C. BGP daemon (bgpd)
- D. Routing protocols daemon (rpd)

Answer: BD

QUESTION 148

On which operating system is the Junos OS based?

- A. ScreenOS
- B. Solaris
- C. FreeBSD
- D. HP-UX

Answer: C

QUESTION 149

What is an advantage of multiple software processes running in the Junos OS?

- A. Each process has its own protected memory space.
- B. Each process is started manually by the user at boot.
- C. All processes are dependent on each other.
- D. Multiple processes allow each routing protocol to be independent.

Answer: A

QUESTION 150

Which two statements are true regarding the role of the Routing Engine (RE)? (Choose two.)

- A. The RE controls and monitors the chassis.
- B. The RE manages the Packet Forwarding Engine (PFE).
- C. The RE receives a copy of the forwarding table from the forwarding plane.
- D. The RE implements class of service (COS).

Answer: AB

QUESTION 151

Which statement is true regarding the Junos OS?

- A. All platforms running the Junos OS separate the functions of learning and flooding.
- B. All platforms running the Junos OS separate the functions of control and forwarding.
- C. All platforms running the Junos OS separate the functions of routing and bridging.
- D. All platforms running the Junos OS separate the functions of management and routing.

Answer: B

QUESTION 152

Which statement is true about the forwarding plane?

- A. The forwarding plane is the intelligence of the platform.
- B. The forwarding plane is based on an X86 architecture.
- C. The forwarding plane maintains the routing tables, bridging table, and primary forwarding table.
- D. The forwarding plane implements policers, stateless firewall filters, and class of service.

Answer: D

QUESTION 153

Which statement is true regarding the forwarding plane?

- A. The forwarding plane is contained within the Routing Engine (RE).
- B. The forwarding plane processes and evaluates exception traffic.
- C. The forwarding plane contains the Packet Forwarding Engine (PFE).
- D. The forwarding plane is not present on all platforms running the Junos OS.

Answer: C

QUESTION 154

Which statement is true about the forwarding plane?

- A. It uses ASICs for increased performance.
- B. It is the intelligence of the platform.
- C. It maintains the routing tables.
- D. It is based on an x86 architecture.

Answer: A

QUESTION 155

By default, which character indicates the configuration mode prompt?

- A. #
- B. >
- C. \$
- D. %

Answer: A

QUESTION 156

By default, which character indicates the UNIX shell prompt?

- A. #
- B. >
- C. \$
- D. %

Answer: D

QUESTION 157

How do you ping from configuration mode?

- A. [edit interfaces]
 user@router# run ping 1.1.1.1
- B. [edit interfaces]
 user@router# ping 1.1.1.1
- C. [edit interfaces]
 user@router# up ping 1.1.1.1
- D. [edit interfaces]
 user@router# exit ping 1.1.1.1

Answer: A

QUESTION 158

Which two commands will successfully create ping traffic? (Choose two.)

```
A. user@router# ping 10.10.10.1
B. user@router# run ping 10.10.10.1
C. user@router> ping 10.10.10.1
D. user@router> request ping 10.10.10.1
```

Answer: BC

QUESTION 159

Which command is used to display all output at once?

```
A. show interfaces | allB. show interfaces | no-moreC. show interfaces | holdD. show interfaces | display-all
```

Answer: B

QUESTION 160

Which CLI command is used to display output one page at a time?

```
A. user@router> show interfaces | no-more
B. user@router> show interfaces | trim
C. user@router> show interfaces
D. user@router> show interfaces | display
```

Answer: C

QUESTION 161

What information does the help reference command provide?

- A. A brief description of commands and their default values
- B. The serial number and version number of the device used to open a support case with JTAC
- C. A list of all the active hardware alarms on the device
- D. A display of the current configuration while in operational mode

Answer: A

QUESTION 162

Which command do you use to identify the meaning of a syslog message?

- A. help log messages
- B. man log messages
- C. man syslog
- D. help syslog

Answer: D

QUESTION 163

You want to log in to the router and make a configuration change. After logging in as the root user, what is the next command you must enter?

- A. enable
- B. configure
- C. edit
- D. cli

Answer: D

QUESTION 164

You are configuring a new BGP neighbor and want to view the configuration of interface ge-0/0/0.42. Which command do you use to achieve this result?

- A. [edit protocols bgp group external] user@router# set interfaces ge-0/0/0.42
- B. [edit protocols bgp group external] user@router# edit show interfaces ge-0/0/0.42
- C. [edit protocols bgp group external]
 user@router# top show interfaces ge-0/0/0.42
- D. [edit protocols bgp group external]
 user@router# show interfaces ge-0/0/0.42

Answer: C

QUESTION 165

You are at the top of the hierarchy and must configure OSPF on interface so-0/0/0 unit 100. Which two achieve this result? (Choose two.)

- A. set protocols
 setospf area 0
 set interface so-0/0/0.100
- B. set protocols ospf area 0 interface so-0/0/0.100
- C. edit protocols ospf interface so-0/0/0.100
- D. edit protocols ospf area 0 set interface so-0/0/0.100

Answer: BD

QUESTION 166

Which CLI keyboard sequence allows you to move the cursor to the beginning of the line?

- A. Ctrl+e
- B. Ctrl+p
- C. Ctrl+w
- D. Ctrl+a

Answer: D

QUESTION 167

Which two statements apply when a user has entered private configuration mode by typing configure private? (Choose two.)

- A. All users have their own active configuration.
- B. All users have their own private candidate configuration.
- C. When a user commits, all nonconflicting changes made by all users are committed.
- D. When a user commits, only the user's own changes are committed.

Answer: BD

QUESTION 168

Which two statements are true when using the configure exclusive CLI command? (Choose two.)

- A. Multiple users can enter configuration mode and have their own private configuration.
- B. When a user commits, only the user's changes are committed.
- C. A message indicates which other users are in configuration mode and what portion of the configuration they are editing.
- D. Only a single user can edit the configuration.

Answer: BD

QUESTION 169

How do you save the current candidate configuration in the set format to permanent storage media?

A. [edit]
 user@router# show | set | save /var/tmp/current.conf

B. [edit]
 user@router# show | compare set | save /var/tmp/current.conf

C. [edit]
 user@router# save /var/tmp/current.conf | display set

D. [edit]
 user@router# show | display set | save /var/tmp/current.conf

Answer: D

QUESTION 170

You configured an interface with an IP address and committed the change. You then committed a change that added an exception in a firewall filter to allow this network through the filter. You realize that this work was done on the wrong router. How do you undo all these changes?

- A. rollback 2
- B. rollback 1
- C. rollback 0
- D. rollback 3

Answer: A

QUESTION 171

You have just issued the command user@router# save current.conf. Assuming the default settings, where in the file system is current.conf saved?

A. /var/tmp/

- B. /var/config/saved/
- C. /var/home/user/
- D. /config/

Answer: C

QUESTION 172

Using the command, user@router# load override latest.conf, where in the file system will the latest.conf be located?

- A. /var/home/user/
- B. /var/config/saved/
- C. /var/tmp/
- D. /config/

Answer: A

QUESTION 173

What does the command show | compare rollback 1 display?

- A. the difference between the current candidate configuration and the candidate configuration from one commit ago
- B. the difference between the current active configuration and the current candidate configuration
- C. the difference between the current active configuration and the active configuration from one commit ago
- D. the difference between the current candidate configuration and the archived configuration from one commit ago

Answer: D

QUESTION 174

How do you write the current candidate configuration to the permanent storage media?

A. [edit]

user@router# save /var/tmp/current.conf

B. [edit]

user@router# write /var/tmp/current.conf

C. [edit]

user@router# commit /var/tmp/current.conf

D. [edit]

user@router# dump /var/tmp/current.conf

Answer: A

QUESTION 175

Which J-Web tab do you use to add licenses to the device?

- A. "Configure"
- B. "Troubleshoot"
- C. "Monitor"
- D. "Maintain"

Answer: D

QUESTION 176

Which three functions are available under the "Maintain" tab of J-Web? (Choose three.)

- A. download and delete log files
- B. view real-time statistics of interfaces
- C. reboot the system
- D. view and add licenses
- E. edit security settings

Answer: ACD

QUESTION 177

Which command is used to enable access to J-Web using HTTPS?

- A. set system remote-access profile https
- B. set services remote-access profile j-web-https
- C. set system services web-management https
- D. set services web-management j-web-https

Answer: C

QUESTION 178

How can you verify that you have correctly configured SSH access to your Junos device?

- A. user@router# show system services
- B. user@router> show configuration services
- C. user@router# show configuration system services
- D. user@router# show system login

Answer: A

QUESTION 179

What must be configured prior to the first commit after factory defaults are loaded?

- A. root authentication
- B. default gateway
- C. host name
- D. management services

Answer: A

QUESTION 180

Which two statements are true about the rescue configuration file? (Choose two.)

- A. It must include a root password.
- B. It is rollback file number 50, and you can recover it by issuing rollback 50.
- C. It is created by issuing request system configuration rescue save.
- D. It is updated automatically when you commit.

Answer: AC

QUESTION 181

Which command will save the current active configuration as the rescue configuration?

- A. user@router# save | rescue
- B. user@router> request system configuration rescue save
- C. user@router# save rescue configuration
- D. user@router> file save rescue-configuration

Answer: B

QUESTION 182

Which command will delete the current rescue configuration?

- A. user@router# system delete configuration rescue
- B. user@router> request system configuration rescue delete
- C. user@router# delete rescue configuration
- D. user@router> file delete rescue-configuration

Answer: B

QUESTION 183

Which two statements are true about the primary address on an interface? (Choose two.)

- A. It is the address used by default as the local address for broadcast and multicast packets sourced locally and sent out of the interface.
- B. You use the primary address when you have multiple IP addresses belonging to the same subnet on the same interface.
- C. It can be useful for selecting the local address used for packets sent out of unnumbered interfaces when multiple non-127 addresses are configured on the loopback interface.
- D. By default, the primary address on an interface is selected as the numerically highest local address configured on the interface.

Answer: AC

QUESTION 184

What are three physical interface properties? (Choose three.)

- A. payload scrambling
- B. virtual circuit identifier
- C. FCS
- D. link speed
- E. IP address

Answer: ACD

QUESTION 185

Which two commands may be used when configuring an IP address for a Gigabit Ethernet interface? (Choose two.)

- A. set interfaces ge-0/0/0.0 address 10.1.1.1/24
- B. set interfaces ge-0/0/0.0 family inet address 10.1.1.1/24
- C. set interfaces ge-0/0/0 unit 0 family inet address 10.1.1.1/24

D. set interfaces ge-0/0/0 address 10.1.1.1/24

Answer: BC

QUESTION 186

You accidentally configured interface so-0/0/0.0 with /32 instead of /30. Which two solutions could you use to correct this configuration? (Choose two.)

- A. [edit interfaces so-0/0/0.0]
 user@router# replace family inetaddress /32 with /30
- B. [edit interfaces so-0/0/0.0]
 user@router# rename family inetaddress /32 to address /30
- C. [edit]

user@router# replace interface so-0/0/0.0 family inetaddress /32 with address /30

D. [edit interfaces so-0/0/0.0]
 user@router# delete family inet address
 user@router# set family inetaddress /30

Answer: BD

QUESTION 187

Which three user authentication methods are supported by the Junos OS? (Choose three.)

- A. RADIUS
- B. CHAP
- C. local user database
- D. TACACS+
- E. PAP

Answer: ACD

QUESTION 188

Which user authentication method is supported by the Junos OS as a last resort alternative?

- A. TACACS+
- B. RADIUS
- C. local user database
- D. enable password

Answer: C

QUESTION 189

Which two external authentication methods are supported by the Junos OS for user authentication? (Choose two.)

- A. RADIUS
- **B. KERBEROS**
- C. IPsec
- D. TACACS+

Answer: AD

QUESTION 190

The authentication order configuration on your M120 includes the settings tacplus and radius (in that order), but does not include the password parameter. You attempt to log in to the device, but the network containing the authentication servers is currently down. Which statement is true about your login attempt?

- A. The login attempt is rejected.
- B. The login attempt is automatically accepted after the authentication servers' timeout value is reached, since there are no other authentication methods available.
- C. The M120 automatically tries authenticating locally on the device after the authentication servers' timeout value is reached.
- D. The M120 automatically tries authenticating locally on the device before using external authentication.

Answer: C

QUESTION 191

You have been asked to configure a login class that will permit its users to view and edit the configuration. The class should allow a user to view the entire configuration, but only to edit the interfaces, routing-options, and protocols hierarchies. Which configuration accomplishes this login class?

```
A. permissions [ view-configuration clear network view ];
   allow-configuration "(interfaces) | (routing-options) | (policy-options)
        (protocols)";
B. permissions [ view-configuration clear network view ];
   allow-commands "(configure)";
C. permissions [ view-configuration clear network view ];
   allow-commands "(configure)";
   allow-configuration "(interfaces) | (routing-options) | (protocols)";
D. permissions [ clear network view ];
   allow-commands "(configure)";
   allow-configuration "(interfaces) | (routing-options) | (protocols)";
```

Answer: C

QUESTION 192

Which two login-class permissions could permit a user to view the system hierarchy of the active configuration? (Choose two.)

- A. system permission
- B. view-configuration permission
- C. network permission
- D. super-user permission

Answer: AB

QUESTION 193

Which login class permission will allow a user to use the telnet utility?

- A. network permission
- B. maintenance permission
- C. supervisor permission

D. shell permission

Answer: A

QUESTION 194

Which two statements are true regarding trace options on Junos devices? (Choose two.)

- A. You can see the contents of the log file by entering the show log <filename> command.
- B. Trace options will send information to your screen automatically.
- C. Trace options are limited to one protocol at a time.
- D. The file name and a set of flags may be specified when enabling traceoptions.

Answer: AD

QUESTION 195

Which directory does the Junos OS use to store syslog information by default?

- A. /var/messages
- B. /var/syslog
- C. /var/tmp
- D. /var/log

Answer: D

QUESTION 196

Which statement is true regarding syslog on Junos devices?

- A. No logging is enabled by default.
- B. By default, the information is stored in a file named events.
- C. Only the message severity level must be configured.
- D. You can configure the router to send log messages to the console.

Answer: D

QUESTION 197

What is the default SNMP permission level on Junos devices?

- A. read
- B. read-write
- C. read-only
- D. write

Answer: C

QUESTION 198

Which operational mode command can be used to synchronize the local system time with an NTP server?

- A. set ntp time 64.32.129.3
- B. set clock ntp 64.32.129.3
- C. set time 64.32.129.3

D. set date ntp 64.32.129.3

Answer: D

QUESTION 199

When configuring more than one archival site, which statement is true?

- A. The system will first attempt the transfer using the URL configured last.
- B. The system will transfer the configuration to each archival site.
- C. The system will not transfer to a secondary site unless the previous site fails.
- D. The system will transfer using secure copy protocol (SCP) before attempting FTP.

Answer: C

QUESTION 200

When considering the default behavior of Junos platforms, which statement is true about archiving configurations?

- A. A system log message is generated, confirming the transfer attempt.
- B. The destination filename format can be altered by configuration.
- C. The frequency the system archives the configuration cannot be changed.
- D. An archive log is created to track transfer attempts, both failed and successful.

Answer: A

QUESTION 201

You have been asked to configure your router to send link-related SNMP trap notifications to the network management system (NMS) located at address 172.16.17.1. Which two commands are required? (Choose two.)

- A. set snmp trap-group my-trap-group targets 172.16.17.1
- B. set snmp targets 172.16.17.1
- C. set snmp trap-group my-trap-group link-status
- D. set snmp trap-group my-trap-group categories link

Answer: AD

QUESTION 202

Which statement is true regarding the Network Time Protocol (NTP) on Junos devices?

- A. MD5 authentication is supported by the Junos OS.
- B. Server mode is not supported by the Junos OS.
- C. The Junos OS can provide a primary time reference.
- D. The Junos OS does not support the use of a boot server.

Answer: A

QUESTION 203

A network administrator would like to view detailed interface status, properties, statistics, errors, and CoS packet counters. Which operational command will display this information?

A. show interfaces extensive

- B. show interfaces
- C. show configuration interfaces
- D. show interface status

Answer: A

QUESTION 204

When using the monitor traffic command on Junos devices, which UNIX-based utility is accessed?

- A. snoop
- B. tcpdump
- C. monitor
- D. tail

Answer: B

QUESTION 205

Which command will allow you to quickly determine the administrative status of all interfaces on a Junos device?

- A. show interfaces status
- B. show interfaces summary
- C. show interfaces terse
- D. show interfaces admin

Answer: C

QUESTION 206

A network administrator wants to verify the active alarms on interface so-0/0/0.0. Which command displays this information?

- A. show interfaces alarms
- B. show interfaces terse
- C. show alarms extensive
- D. show interfaces extensive

Answer: D

QUESTION 207

Your network administrator has asked you to view the real-time interface usage on ge- 0/0/0. Which command would be used?

- A. monitor interface ge-0/0/0
- B. traceoptions interface ge-0/0/0
- C. debug interface ge-0/0/0
- D. monitor usage ge-0/0/0

Answer: A

QUESTION 208

Which operational command would you use to quickly verify the state of all interfaces?

- A. show interfaces terse
- B. show interfaces
- C. show configuration interfaces
- D. show interface status

Answer: A

QUESTION 209

Which command displays the amount of space available on the storage media?

- A. show chassis routing-engine
- B. show system file-storage
- C. file list
- D. show system storage

Answer: D

QUESTION 210

Which command do you use to display the messages seen during the last system boot?

- A. show system boot-messages
- B. show chassis messages
- C. show file system boot-messages
- D. show boot-log messages

Answer: A

QUESTION 211

Which command do you use to show active alarms?

- A. show hardware state
- B. show system alarms
- C. show chassis state
- D. show services alarms

Answer: B

QUESTION 212

Which command do you use as a valid way to view the PICs within a router as well as the PICs' serial numbers?

- A. show chassis hardware
- B. show chassis interfaces
- C. show chassis pic
- D. show chassis inventory

Answer: A

QUESTION 213

What is a valid option when using the ping command?

- A. packet loss
- B. packet size
- C. CRC
- D. TCP port

Answer: B

QUESTION 214

You issue the ping interface t1-1/1/0 bypass-routing count 1000 rapid command. Which statement is correct?

- A. The count parameter creates a counter that you can view with the show firewall command.
- B. The count parameter allows the router to count the number of pings for logging purposes.
- C. The count parameter allows the router to pause for 1000 seconds before sending out a ping.
- D. The count parameter allows the router to send out 1000 pings and then stop.

Answer: D

QUESTION 215

You issue the ping interface t1-1/1/0 1.1.1.1 bypass-routing count 1000 rapid command. Which statement is correct?

- A. The bypass-routing parameter is used to test the density on the T1 line.
- B. The bypass-routing parameter cannot be used on a T1 interface.
- C. The bypass-routing parameter allows you to ping a host through an interface that has no route through it.
- D. The bypass-routing parameter allows you to ping a local WAN interface without generating any outbound traffic.

Answer: C

QUESTION 216

You issue the command telnet interface ge-1/1/0 10.10.10.1 source 192.168.100.1 bypass-routing. Which statement is correct?

- A. The bypass-routing parameter is ignored when using private IP addressing.
- B. The telnet session will have the source IP address 10.10.10.1.
- C. The telnet session will connect to the neighboring device's interface ge-1/1/0.
- D. Return traffic for the telnet session might not arrive at interface ge-1/1/0.

Answer: D

QUESTION 217

Which command do you issue to upgrade the current software on Junos devices?

- A. request system software replace
- B. request system software install
- C. request system software add
- D. request system software upgrade

Answer: C

QUESTION 218

Which two commands allow you to return to a previous version of software on the device? (Choose

two.)

- A. request system software add
- B. request system software downgrade
- C. request system software replace
- D. request system software rollback

Answer: AD

QUESTION 219

Which CLI command do you use to determine which files are cleanup candidates?

- A. request system storage cleanup candidates
- B. request system services storage candidates
- C. request system services candidate cleanup
- D. request system storage cleanup dry-run

Answer: D

QUESTION 220

Which three steps are part of the root password recovery process? (Choose three.)

- A. Reboot the device.
- B. Run the recovery script.
- C. Reset the root password.
- D. Reset the user passwords.
- E. Load factory-default configuration.

Answer: ABC

QUESTION 221

During a password recovery, what is the next step after configuring the system to boot into single-user mode?

- A. Reset the root password.
- B. Press the space bar.
- C. Type recovery.
- D. Press the "Enter" key.

Answer: C

QUESTION 222

Which statement is true regarding the password-recovery process?

- A. You must have a console connection.
- B. You cannot set the console port to an insecure mode.
- C. You must press the Enter key so that you can boot into single-user mode.
- D. When prompted to enter the full pathname of the shell, you must press the Enter key.

Answer: A

QUESTION 223

What is the role of route preference?

- A. It is used as a tiebreaker when the same prefix is available through multiple protocols.
- B. It is used to determine the preferred path to a given destination.
- C. It is used to select the best route between multiple equal-cost paths.
- D. It is used to select which routing table to use for forwarding.

Answer: A

QUESTION 224

Which two statements are correct regarding default protocol preference values? (Choose two.)

- A. OSPF internal routes have a lower preference than static routes.
- B. Both direct and local routes have the same preference value.
- C. OSPF's preference value is lower than BGP.
- D. OSPF has a single preference value for both internal and external routes.

Answer: BC

QUESTION 225

What is the default route preference value for EBGP?

- A. 20
- B. 100
- C. 170
- D. 200

Answer: C

QUESTION 226

Which two statements are correct regarding default protocol preference values? (Choose two.)

- A. RIP is preferred over OSPF external routes.
- B. Direct, local, and static routes have the same preference value.
- C. OSPF's preference value is lower than BGP.
- D. OSPF has a single preference value for both internal and external routes.

Answer: AC

QUESTION 227

What is the default protocol preference for OSPF internal routes?

- A. 10
- B. 15
- C. 150
- D. 160

Answer: A

QUESTION 228

You are modifying the default route preference under the [edit protocols] hierarchy. In which two

routing information sources can you change the default preference value? (Choose two.)

- A. local
- B. OSPF
- C. direct
- D. BGP

Answer: BD

QUESTION 229

By default, if equal-cost paths exist for the same destination, which action will the router take?

- A. Drop half the traffic.
- B. Make a copy of the traffic and send it to both destinations.
- C. Load-balance traffic between the available paths.
- D. Randomly select one of the available paths to send traffic.

Answer: D

QUESTION 230

Which command will display only direct routes?

- A. show route
- B. show route inet.0 direct
- C. show ip route direct
- D. show route protocol direct

Answer: D

QUESTION 231

What are two reasons why a route might be hidden? (Choose two.)

- A. route preference
- B. routing loop
- C. invalid next hop
- D. routing policy

Answer: CD

QUESTION 232

When attempting to view the OSPF routes in the routing table, you issue the command show route table inet.3 but no OSPF routes are displayed. What is the problem?

- A. The OSPF routes are located in the inet4.0 routing table.
- B. The OSPF routes are located in the inet.0 routing table.
- C. The OSPF routes are located in the inet.2 routing table.
- D. The OSPF routes are located in the inet4.3 routing table.

Answer: B

QUESTION 233

By default, what are three valid routing tables? (Choose three.)

- A. inet.0
- B. inet4.0
- C. inet.6
- D. inet6.0
- E. inet.3

Answer: ADE

QUESTION 234

Which two commands would you use to view OSPF routes? (Choose two.)

- A. show ip route ospf
- B. show ospf routes
- C. show route protocol ospf
- D. show route

Answer: CD

QUESTION 235

Which statement is true about routing tables on a Junos device?

- A. They purge any routes not selected as active routes.
- B. They exist in two places: the Routing Engine and the Packet Forwarding Engine.
- C. They are exclusively designed to handle dynamic routing protocols.
- D. They populate the forwarding table.

Answer: D

QUESTION 236

Which two statements are true about the forwarding table? (Choose two.)

- A. The forwarding table lists each source protocol and preference for each destination.
- B. The forwarding table contains only active routes.
- C. The forwarding table is used to process transit packets.
- D. The forwarding table is stored in compact flash.

Answer: BC

QUESTION 237

Which statement is true about the forwarding table?

- A. The forwarding table is stored in the control plane only.
- B. The forwarding table is stored in the control plane and in the forwarding plane.
- C. The forwarding table contains both active and inactive routes.
- D. The forwarding table can contain only a single next hop per destination.

Answer: B

QUESTION 238

Which statement is true about a routing table?

- A. It contains routes learned dynamically only.
- B. It finds the best path to each destination by using a modified shortest-path-first calculation.
- C. It contains only active BGP routes.
- D. It contains all accepted routes to all destinations.

Answer: D

QUESTION 239

Which statement is true about the routing table?

- A. The routing table exists in the control plane only.
- B. The routing table exists in the control plane and in the forwarding plane.
- C. The routing table contains both active and inactive routes.
- D. The routing table is stored on compact flash.

Answer: A

QUESTION 240

You have been asked to create a static route with a next hop that is not directly connected to the router. Which configuration parameter enables the static route to accomplish this scenario?

- A. resolve
- B. indirect
- C. next-hop
- D. recursive

Answer: A

QUESTION 241

You have been asked to configure your MX240 with a default route toward your upstream ISP at IP address 192.168.100.1. Which command successfully completes this task?

- A. user@router# set routing-options static route 0.0.0.0/0 next-hop 192.168.100.1
- B. user@router# set routing-options default route 0.0.0.0/0 next-hop 192.168.100.1
- C. user@router# set forwarding-options static route 0.0.0.0/0 next-hop 192.168.100.1
- D. user@router# set protocols default route 0.0.0.0/0 next-hop 192.168.100.1

Answer: A

QUESTION 242

Which protocol creates a complete database of the network topology prior to calculating the optimal route?

- A. BGP
- B. PIM
- C. OSPF
- D. RIP

Answer: C

QUESTION 243

Which statement describes an advantage of dynamic routing?

- A. Dynamic routing is typically more scalable when compared to static routing.
- B. Unlike static routing, dynamic routing requires no initial user configuration.
- C. Unlike static routing, dynamic routing provides redundant IP addresses for end-user devices.
- D. Dynamic routing provides DNS services along with IP connectivity, whereas static routing does not.

Answer: A

QUESTION 244

What is an advantage of dynamic routing?

- A. Unlike static routing, dynamic routing provides redundant IP addresses for end-user devices.
- B. Unlike static routing, dynamic routing requires no initial user configuration.
- C. Dynamic routing can provide increased network availability when compared to static routing.
- D. Dynamic routing provides DNS services along with IP connectivity; static routing does not.

Answer: C

QUESTION 245

Which statement describes an advantage of dynamic routing?

- A. Dynamic routing provides redundant IP addresses for end-user devices, unlike static routing.
- B. Dynamic routing requires no initial user configuration, unlike static routing.
- C. Dynamic routing provides DNS services along with IP connectivity; static routing does not.
- D. Dynamic routing typically requires less time to implement than static routing in a large network.

Answer: D

QUESTION 246

You have a network containing 120 routers. You must establish and maintain connectivity between the loopback interfaces of all routers. Because of the critical services using the network, you need redundancy and fast failover. Which routing protocol should you use in this scenario?

- A. OSPF
- B. RIP
- C. BGP
- D. static

Answer: A

QUESTION 247

Which three SONET network elements are used for troubleshooting? (Choose three.)

- A. line
- B. path
- C. circuit
- D. section
- E. segment

Answer: ABD

QUESTION 248

Which application would be suited for UDP traffic?

- A. Web browsing
- B. downloading a program
- C. streaming television shows
- D. on-line shopping

Answer: C

QUESTION 249

Which two loopback types are supported for serial interfaces on Juniper devices? (Choose two.)

- A. Local
- B. Far End
- C. Remote
- D. Bidirectional

Answer: AC **Explanation:**

For serial interfaces Juniper devices support the local and the remote loopback types. http://www.juniper.net/documentation/en_US/junos12.3/topics/usageguidelines/interfaces-interface-diagnostics.html

QUESTION 250

When you display the routing table by entering the show route command, what does the * indicate?

- A. The route is a direct route.
- B. The route was selected as active.
- C. The route is a default route.
- D. The route was learned using a dynamic routing protocol.

Answer: B Explanation:

An asterisk (*) indicates that the route is both the active and the last active route. An asterisk before a to line indicates the best subpath to the route.

https://www.juniper.net/documentation/en_US/junos14.1/topics/reference/commandsummary/show-route-detail.html

QUESTION 251

What is the default import routing policy for OSPF?

- A. Accept all OSPF routes and install them into the inet.3 routing table.
- B. Accept all OSPF routes and install them into the inet7.0 routing table.
- C. Accept all OSPF routes and install them into the inet4.0 routing table.
- D. Accept all OSPF routes and install them into the inet.0 routing table.

Answer: D

QUESTION 252

By default, which two statements are true about export routing policies? (Choose two.)

- A. Export policies can evaluate only active routes.
- B. Export policies can evaluate all routes.
- C. Export policies can be applied to the forwarding table.
- D. Export policies can be applied directly to interfaces.

Answer: AC

QUESTION 253

What is the default export routing policy for EBGP?

- A. Accept all active BGP routes.
- B. Accept all BGP routes.
- C. Accept no routes.
- D. Accept all active IGP routes.

Answer: A

QUESTION 254

You have received a default route through BGP from your ISP and you want to redistribute it into OSPF. Which method will accomplish this?

- A. Apply an export policy to OSPF that exports the default route.
- B. Apply an import policy to OSPF that imports the default route.
- C. Apply the default-network command to OSPF.
- D. Apply the redistribute-igp command to BGP.

Answer: A

QUESTION 255

There are three static routes in the routing table that need to be announced to your OSPF peers. Which method is used to accomplish this?

- A. Apply an import policy to OSPF that injects the static routes into OSPF.
- B. Apply an import policy to the static routes that injects the static routes into OSPF.
- C. Apply an export policy to the static routes that injects the static routes into OSPF.
- D. Apply an export policy to OSPF that injects the static routes into OSPF.

Answer: D

QUESTION 256

What is the default export routing policy for RIP?

- A. Accept all local routes.
- B. Accept all RIP routes.
- C. Accept no routes.
- D. Accept all direct routes.

Answer: C

QUESTION 257

What is a route filter?

- A. a list of prefixes that can be configured in a policy
- B. a single prefix that is configured separately, and can be referenced in a policy
- C. a list of prefixes that is configured separately and can be referenced in a policy
- D. a single prefix that can be configured within a policy

Answer: D

QUESTION 258

What are two valid actions for a routing policy? (Choose two.)

- A. discard
- B. next policy
- C. accept
- D. ignore

Answer: BC

QUESTION 259

What are two valid match criteria for a routing policy? (Choose two.)

- A. OSPF area ID
- B. prefix list
- C. port
- D. time-to-live (TTL)

Answer: AB

QUESTION 260

What are three valid match criteria in a firewall filter applied to a Layer 3 interface? (Choose three.)

- A. IP address
- B. MAC address
- C. protocol
- D. port
- E. session ID

Answer: ACD

QUESTION 261

A packet is evaluated against three user-defined terms within a firewall filter and no match is found. What correctly describes the action the firewall filter will take for this packet?

- A. The filter will permit the packet and take no additional action.
- B. The filter will reject the packet and send an ICMP message back to the sender.
- C. The filter will discard the packet and take no additional action.
- D. The filter will permit the packet and write a log entry to the firewall log.

Answer: C

QUESTION 262

What are three terminating actions for firewall filters? (Choose three.)

- A. reject
- B. drop
- C. permit
- D. accept
- E. discard

Answer: ADE

QUESTION 263

Which two can be used to create and apply an export policy that advertises static routes to RIP neighbors? (Choose two.)

- A. set protocols rip export demo
- B. edit policy-options policy-statement demo set term 1 from protocol static set term 1 then accept
- C. edit policy-options policy-statement demo set term 1 from protocol static accept
- D. set protocols rip group internal export demo

Answer: BD

QUESTION 264

Which configuration causes RIP-learned routes to be advertised to other RIP neighbors?

- A. set protocol rip no-passive
- B. top edit policy-options policy-statement demo
 - set term 1 from protocol rip
 - set term 1 then accept
 - top set protocols rip group internal export demo
- C. set protocols rip advertise in-out
- D. top edit policy-options policy-statement demo
 - set term 1 from active routes
 - set term 1 then accept
 - top set protocols rip group internal export demo

Answer: B

QUESTION 265

You need to control SSH, HTTP, and Telnet access to an MX240 router through any interface. You have decided to use a firewall filter. How should you apply the firewall filter?

- A. as an outbound filter on interface fxp0
- B. as an outbound filter on interface lo0
- C. as an inbound filter on interface fxp0
- D. as an inbound filter on interface lo0

Answer: D

QUESTION 266

What are three benefits of class of service? (Choose three.)

- A. It can make a slow network faster.
- B. It can prioritize latency-sensitive traffic.
- C. It can eliminate congestion.
- D. It can control congestion.
- E. It can allocate bandwidth for different classes of traffic.

Answer: BDE

QUESTION 267

Random early detection (RED) is associated with which class of service component?

- A. classification
- B. policing
- C. queuing
- D. scheduling

Answer: D

QUESTION 268

Which class-of-service component allows you to define the bandwidth allocated to different traffic types?

- A. classification
- B. rewrite marking
- C. scheduling
- D. queuing

Answer: C

QUESTION 269

What are two purposes of a forwarding class? (Choose two.)

- A. to identify traffic that should be dropped
- B. to classify traffic
- C. to identify traffic that should receive common treatment
- D. to assign traffic to output queues

Answer: CD

QUESTION 270

What represents the binary equivalence of 207?

- A. 11001111
- B. 11101011
- C. 11010111
- D. 11010101

Answer: A

QUESTION 271

What represents the binary equivalence of 96?

- A. 11010100
- B. 01100000
- C. 11010000
- D. 11101010

Answer: B

QUESTION 272

What represents the decimal equivalence of 01101110?

- A. 90
- B. 96
- C. 110
- D. 118

Answer: C

QUESTION 273

What represents the decimal equivalence of 11100101?

- A. 5
- B. 93
- C. 177
- D. 229

Answer: D

QUESTION 274

What represents the decimal equivalence of 11100111?

- A. 195
- B. 223
- C. 230
- D. 231

Answer: D

QUESTION 275

What represents the binary equivalence of 148?

- A. 10010110
- B. 11010010
- C. 10011100
- D. 10010100

Answer: D

QUESTION 276

What is the decimal equivalent of 10101010?

- A. 182
- B. 180
- C. 172
- D. 170

Answer: D

QUESTION 277

What information is used by a switch to forward an Ethernet frame to its destination?

- A. IP address
- B. destination MAC address
- C. ARP table entry
- D. FCS checksum

Answer: B

QUESTION 278

Which two statements accurately describe a broadcast domain? (Choose two.)

- A. Broadcast domains require that the participating devices connect to common switches or hubs.
- B. Broadcast domains consist of devices reachable by frames addressed to the Layer 2 broadcast address.
- C. Broadcast domains require a gateway device such as a router.
- D. Broadcast domains consist of devices that reside on the same VLAN.

Answer: BD

QUESTION 279

Which two statements are correct about Layer 2 broadcast frames? (Choose two.)

- A. Layer 2 broadcast frames are processed by all devices on the same VLAN.
- B. Layer 2 broadcast frames are discarded by routers that connect to multiple VLANs.
- C. Layer 2 broadcast frames are relayed by routers to all connected VLANs.
- D. Layer 2 broadcast frames are relayed by switches to devices on the same VLAN.

Answer: AD

QUESTION 280

Which two fields are found in an Ethernet frame header? (Choose two.)

- A. TTL
- B. flags
- C. checksum
- D. type

Answer: CD

QUESTION 281

In the MAC address 00:90:69:9f:ea:46, what represents the Organizationally Unique Identifier (OUI)?

- A. 69:9f:ea:46
- B. 00:90:69:9f
- C. 9f:ea:46
- D. 00:90:69

Answer: D

QUESTION 282

What is a valid multicast MAC address?

- A. 00:90:69:9f:ea:46
- B. ff:ff:ff:ff:ff
- C. 01:00:5e:28:12:95
- D. 99:99:99:99:99

Answer: C

QUESTION 283

Which two statements are true regarding an Ethernet collision domain? (Choose two.)

- A. If a switch is used, the collision domain is limited to each device and the switch.
- B. If a hub is used, the collision domain is limited to each device and the hub.
- C. If a hub is used, the collision domain includes all devices connected to the hub.
- D. If a switch is used, the collision domain includes all devices connected to the switch.

Answer: AC

QUESTION 284

Two devices on an Ethernet segment sent frames at the same time causing a collision. Which two statements are true? (Choose two.)

- A. Both devices stop transmitting, wait a random period of time, verify the wire is idle, and re-transmit.
- B. The device with the lowest MAC address is permitted to retransmit first.
- C. The device with the lowest MAC address sends a jam signal to notify all other devices of the collision.
- D. Both devices send a jam signal to notify all other devices of the collision.

Answer: AD

QUESTION 285

Which statement is true regarding an Ethernet collision domain?

- A. If a router is used, the collision domain includes all devices connected to the router.
- B. If a hub is used, the collision domain is limited to each device and the hub.
- C. If a switch is used, the collision domain is limited to each device and the switch.
- D. If a bridge is used, the collision domain includes all devices connected to the bridge.

Answer: C

QUESTION 286

What is the purpose of a network mask?

- A. It is used to identify the maximum hop count of a subnetwork.
- B. It is used to identify an IP address as either private or public.
- C. It is used to identify the network to which an IP address belongs.
- D. It is used to identify the total number of bits present in an IP address.

Answer: C

QUESTION 287

What is the purpose of a network mask?

- A. It is used in conjunction with the wildcard mask to determine the number of hosts on a network.
- B. It is used to define which parts of the IP address are allocated to host addresses and network prefixes.
- C. It is used to hide subnets from external networks by masking the subnets with NAT.
- D. It is used to differentiate a network as a classful network or a classless network.

Answer: B

QUESTION 288

Which two statements are true of a network mask? (Choose two.)

- A. A subnet mask specifies the portion of an IP address that is in a binary format.
- B. A subnet mask specifies the portion of an IP address that is in a decimal format.
- C. A subnet mask specifies the portion of an IP address that represents a network prefix.
- D. A subnet mask specifies the portion of an IP address that represents network hosts.

Answer: CD

QUESTION 289

Which two characteristics describe the UDP protocol? (Choose two.)

- A. limited error checking
- B. defined timers
- C. no recovery mechanisms
- D. three-way handshake

Answer: AC

QUESTION 290

You have been asked to develop an application that uses only connection-oriented protocols. Which two protocols can you use? (Choose two.)

- A. PPP
- B. UDP
- C. TCP
- D. ICMP

Answer: AC

QUESTION 291

Which three protocols use UDP as a transport protocol by default? (Choose three.)

- A. HTTP
- B. TFTP
- C. DNS
- D. SNMP
- E. SMTP

Answer: BCD

QUESTION 292

Which two protocols use UDP as a transport protocol by default? (Choose two.)

- A. Telnet
- B. ICMP
- C. DHCP
- D. RIP

Answer: CD

QUESTION 293

Which network mask is the equivalent of 255.255.248.0?

- A. /20
- B. /21
- C. /22
- D. /23

Answer: B

QUESTION 294

You have been assigned the /24 network and need to segment it into at least 60 subnets. Which network mask meets this requirement?

- A. /27
- B. /28
- C. /29
- D. /30

Answer: D

QUESTION 295

You must segment your internal /24 network into a minimum of 12 subnets, each containing a minimum of 12 hosts. Which network mask do you use?

- A. /26
- B. /27
- C. /28
- D. /29

Answer: C

QUESTION 296

What are the usable hosts on the .128.0/19 network?

A. .128.1 through .143.254
B. .128.128 through .134.254
C. .128.0 through .134.254
D. .128.1 through .159.254

Answer: D

QUESTION 297

You have been allocated a /22 network. How many usable hosts are available?

A. 510

B. 512

C. 1022

D. 1024

Answer: C

QUESTION 298

You have been asked to use a 23-bit network mask to segment the network block 209.18.12.0. How many usable host addresses will there be per subnet?

A. 510

B. 1022

C. 2046

D. 8190

Answer: A

QUESTION 299

```
user@router# run show interfaces terse Interface Admin Link Proto Local fe-0/0/0 up up fe-0/0/0.0 up upinet 10.0.39.2/24 iso mpls fe-0/0/1 up up fe-0/0/1.0 up upinet 10.0.18.2/24 fe-0/0/1.5 down up inet 10.0.19.2/24
```

An administrator is unable to ping any address on the 10.0.19.0/24 subnet. To identify the problem, the administrator uses the command shown in the exhibit. Which step should be taken to solve the problem?

- A. Check the physical cable.
- B. Issue the command activate interfaces fe-0/0/1.5.
- C. Issue the command delete interfaces fe-0/0/1.5 disable.
- D. Reconfigure the IP address.

Answer: C

QUESTION 300

interfaces {

Leader of IT Certifications New VCE and PDF Exam Dumps from PassLeader

Referring to the exhibit, which command would you use to add an additional address to the ge-0/0/9.0 interface?

```
ge-0/0/8 {
unit 0 {
family inet {
address 192.168.1.1/24;
ge-0/0/9 {
unit 0 {
family inet {
address 192.168.10.1/24;
}
}
}
A. [edit interfaces ge-0/0/9 unit 0]
   user@router# set family inet address /24
B. [edit interfaces ge-0/0/9 unit 0]
   user@router# set family inet secondary-address /24
C. [edit interfaces ge-0/0/9 unit 0]
   user@router# set family inet address /24 secondary
D. [edit interfaces ge-0/0/9 unit 0]
   user@router# set family inet address-secondary /24
```

Answer: A

QUESTION 301

Referring to the exhibit, what is the purpose of the targets section of the configuration?

```
[editsnmp]
user@router# show
communityCommunityA {
authorization read-only;
clients {
192.168.1.0/28;
}
}
trap-groupgroupA {
categories {
link;
}
targets {
192.168.100.1;
192.168.200.1;
}
}
```

- A. It defines which devices will be sending traps.
- B. It specifies where to send traps.
- C. It defines the IP addresses of management systems that can access the device.
- D. It specifies which devices can be polled for SNMP data.

Answer: B

QUESTION 302

Referring to the exhibit, which statement is correct?

```
traceroute to 10.1.15.2 (10.1.15.2), 30 hops max, 40 byte packets 1 10.1.36.1 (10.1.36.1) 0.651 ms 7.834 ms 0.506 ms 2 10.1.23.1 (10.1.23.1) 0.5 ms 0.5 ms 0.5 ms 3 * * *
```

- A. The packets have exceeded the time-to-live value.
- B. There is a loop.
- C. The asterisks indicate a response time out.
- D. The asterisks indicate that the traceroute is completed.

Answer: C

QUESTION 303

In the exhibit, what does the (>) symbol indicate?

```
user@router# run show route /24
inet.0: 142 destinations, 142 routes (141 active, 0 holddown, 1 hidden)
+ = Active Route, - = Last Active, * = Both
/24 *[OSPF/10] 04:10:20
>to 172.25.213.11 via ge-1/0/1.0
to 172.25.213.23 via ge-1/0/2.0
```

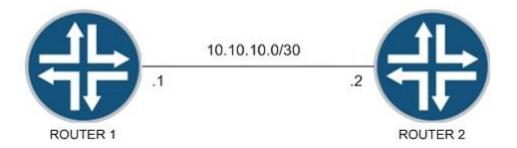

- A. There is a software issue with ge-1/0/1.0 interface.
- B. There is a hardware issue with ge-1/0/1.0 interface.
- C. The next hop of 172.25.213.11 is selected.
- D. The next hop of 172.25.213.11 is not resolvable.

Answer: C

QUESTION 304

You have been asked to establish reachability between Router 1's and Router 2's loopback addresses as shown in the exhibit.

New VCE and PDF Exam Dumps from PassLeader

LOOPBACK ADDRESSES

Router 1 172.17.25.1 Router 2 172.17.28.1

Which two steps will accomplish this task? (Choose two.)

- A. Create a static route on Router 1 to 172.17.28.1 with a next hop of 10.10.10.2.
- B. Create a static route on Router 1 to 172.17.28.1 with a next hop of 10.10.10.1.
- C. Create a static route on Router 2 to 172.17.25.1 with a next hop of 10.10.10.1.
- D. Create a static route on Router 1 to 172.17.25.1 with a next hop of 10.10.10.2.

Answer: AC

QUESTION 305

Given the configuration shown in the exhibit, which statement is correct about traffic matching the route 10.10.10.0/24?

```
[edit routing-options]
user@router# show
static {
  defaults {
  metric 10;
  preference 10;
  }
  route 10.10.10.0/24 {
  next-hop 192.168.100.1;
  qualified-next-hop 192.168.200.1;
  preference 6;
  }
  metric 8;
  }
}
```

- A. It will be forwarded to 192.168.100.1 using a metric of 10.
- B. It will be forwarded to 192.168.100.1 using a metric of 8.
- C. It will be forwarded to 192.168.200.1 using a metric of 8.
- D. It will be forwarded to 192.168.200.1 using a metric of 10.

Answer: C

QUESTION 306

```
user@router> show route
inet.0: 9 destinations, 9 routes (9 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
10.10.10.91/32 *[Direct/0] 00:09:40
>via 100.0
10.10.10.92/32 *[OSPF/10] 00:01:50, metric 1
>to 172.16.1.2 via ge-0/0/2.0
100.100.1.0/24 *[Static/5] 00:01:50
172.16.1.0/24 *[Direct/0] 00:06:09
>via ge-0/0/2.0
172.16.1.1/32 *[Local/0] 00:06:09
Local via qe-0/0/2.0
192.168.0.0/16 *[Aggregate/130] 00:00:06
Reject
192.168.0.0/17 *[Aggregate/130] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
192.168.50.0/24 *[Static/5] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
192.168.51.0/24 *[Static/5] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
user@router> show configuration policy-options
policy-statement demo {
term 1 {
from {
route-filter 192.168.0.0/16 longer accept;
then reject;
}
user@router> show configuration protocols ospf
export demo;
area 0.0.0.0 {
interface qe-0/0/2.0;
```

Given the configuration and routing table shown in the exhibit, which routes will be advertised to OSPF neighbors because of the demo policy?

- A. 192.168.0.0/16 only
- B. 192.168.0.0/17 only
- C. 192.168.50.0/24 and 192.168.51.0/24
- D. 192.168.0.0/17, 192.168.50.0/24, and 192.168.51.0/24

Answer: D

QUESTION 307

```
user@router> show route
inet.0: 9 destinations, 9 routes (9 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
10.10.10.91/32 *[Direct/0] 00:09:40
>via lo0.0
10.10.10.92/32 *[OSPF/10] 00:01:50, metric 1
>to 172.16.1.2 via ge-0/0/2.0
100.100.1.0/24 *[Static/5] 00:01:50
```

```
Reject
172.16.1.0/24 *[Direct/0] 00:06:09

192.168.0.0/17 *[Aggregate/130] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
192.168.50.0/24 *[Static/5] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
192.168.51.0/24 *[Static/5] 00:00:06
>to 172.16.1.2 via ge-0/0/2.0
user@router> show configuration policy-options
policy-statement demo {
term 1 {
from {
protocol static;
route-filter 192.168.0.0/16 orlonger accept;
then accept;
user@router> show configuration protocols ospf
export demo;
area 0.0.0.0 {
interface qe-0/0/2.0;
```

Given the configuration and routing table shown in the exhibit, which routes will be advertised to OSPF neighbors because of the demo policy?

- A. 192.168.0.0/16 only
- B. 192.168.50.0/24 only
- C. 192.168.50.0/24 and 192.168.51.0/24
- D. 192.168.0.0/17, 192.168.50.0/24, and 192.168.51.0/24

Answer: C

QUESTION 308

```
user@router> show configuration firewall
familyinet {
  filter demo {
  term example {
    from {
      source-address {
      100.100.100.0/24;
    }
    destination-address {
      200.200.200.0/24;
    }
} then {
    reject;
}
```

```
term testing {
from {
  source-address {
  10.10.10.0/28;
  }
  destination-address {
  200.200.200.0/24;
  }
  }
  then sample;
}
  term results {
  from {
  address {
  200.200.200.0/24;
  }
  }
  then accept;
}
  term final {
  thenpolicer LAPD;
  }
}
```

Given the configuration shown in the exhibit, what will happen to traffic from source 10.10.10.25 destined to 200.200.200.1?

- A. The traffic will be rejected.
- B. The traffic will be dropped.
- C. The traffic will be forwarded.
- D. The traffic will be policed.

Answer: C

QUESTION 309

Given the configuration and routing table shown in the exhibit, which routes will be advertised to OSPF neighbors because of the demo policy?

```
destinations, 9 routes (9 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
10.10.10.91/32 *[Direct/0] 00:09:40
> via 100.0
10.10.10.92/32 *[OSPF/10] 00:01:50, metric 1
> to 172.16.1.2 via ge-0/0/2.0
100.100.1.0/24 *[Static/5] 00:01:50
Reject
172.16.1.0/24 *[Direct/0] 00:06:09
> via qe-0/0/2.0
172.16.1.1/32 *[Local/0] 00:06:09
Local via ge-0/0/2.0
192.168.0.0/16 *[Aggregate/130] 00:00:06
Reject
192.168.0.0/17 *[Aggregate/130] 00:00:06
> to 172.16.1.2 via ge-0/0/2.0
192.168.50.0/24 *[Static/5] 00:00:06
> to 172.16.1.2 via ge-0/0/2.0
```

```
192.168.51.0/24 *[Static/5] 00:00:06
> to 172.16.1.2 via ge-0/0/2.0
user@router> show configuration policy-options
policy-statement demo {
term 1 {
from {
protocol aggregate;
route-filter 192.168.0.0/16 longer;
then accept;
user@router> show configuration protocols ospf
export demo;
area 0.0.0.0 {
interface qe-0/0/2.0;
A. 192.168.0.0/16 only
B. 192.168.0.0/17 only
C. 192.168.0.0/16 and 192.168.0.0/17
D. 192.168.0.0/17, 192.168.50.0/24, and 192.168.51.0/24
```

Answer: B

QUESTION 310

Referring to the exhibit, which two statements are true? (Choose two.)

```
[edit policy-options]
user@router# show
policy-statement policyABC {
  term A {
    from {
      protocol rip;
      route-filter 192.168.1.0/24 longer;
    }
    then accept;
}
ledit protocols ospf]
user@router# show
export policyABC;
area 0.0.0.0 {
  interface ge-0/0/0.0;
  interface lo0.0;
```

- A. The route 192.168.1.0/25 is accepted.
- B. The route 192.168.2.0/24 is accepted.
- C. OSPF routes will be exported into RIP.
- D. RIP routes will be exported into OSPF.

Answer: AD

QUESTION 311

Given the configuration shown in the exhibit, what is the function of the protect-loopback filter?

```
[edit interfaces]
user@router# show
...
lo0 {
unit 0 {
family inet {
filter {
input protect-loopback;
}
address 192.168.100.1/32;
```

- A. To protect the Routing Engine
- B. To protect all interfaces on the device
- C. To protect the Packet Forwarding Engine
- D. To protect the management interface

Answer: A

QUESTION 312

Referring to the exhibit, you want to block HTTP access to Web-Server from the subnet where Mal-User is located. All other traffic should be permitted.

.

Which firewall filter configuration do you use?

```
A. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  200.200.200.0/24;
  destination-address {
  100.100.100.10/32;
  protocol tcp;
  destination-port http;
  then accept;
  term two {
  then {
  reject;
B. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  100.100.100.0/24;
   destination-address {
   200.200.200.1/32;
```

```
protocol tcp;
  destination-port http;
  then accept;
  term two {
  then {
  reject;
C. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  100.100.100.0/24;
  destination-address {
  200.200.200.1/32;
  protocol tcp;
  destination-port http;
  then reject;
  term two {
  then {
  accept;
D. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  200.200.200.0/24;
  destination-address {
  100.100.100.10/32;
  protocol tcp;
  destination-port http;
  then reject;
  term two {
  then {
  accept;
  }
  }
```

Answer: D

QUESTION 313

Referring to the exhibit, you want to block HTTP access to Web-Server from the subnet where Mal-

User is located. All other traffic should be permitted.

.

Which firewall filter configuration do you use?

```
A. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  200.200.200.0/24;
  destination-address {
  100.100.100.10/32;
  protocol tcp;
  destination-port http;
  then accept;
  term two {
  then {
  reject;
  }
B. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  100.100.100.0/24;
  destination-address {
  200.200.200.1/32;
  protocol tcp;
  destination-port http;
  then accept;
  term two {
  then {
  reject;
C. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
   source-address {
  100.100.100.0/24;
  destination-address {
  200.200.200.1/32;
  protocol tcp;
```

```
destination-port http;
  then reject;
  term two {
  then {
  accept;
  }
D. [edit firewall family inet filter STOP-MAL-USER]
  user@router# show
  term one {
  from {
  source-address {
  200.200.200.0/24;
  destination-address {
  100.100.100.10/32;
  protocol tcp;
  destination-port http;
  then reject;
  term two {
  then {
  accept;
  }
  }
```

Answer: D

QUESTION 314

The configuration in the exhibit is associated with which class of service component?

if-exceeding {
bandwidth-limit 1m;
burst-size-limit 3k;
}
then discard;

- A. Classification
- B. Policing
- C. Queuing
- D. Scheduling

Answer: B

QUESTION 315

Referring to the exhibit, which type of classifier is being used in this CoS configuration? [edit firewall family inet filter COS-CLASSIFIER] user@router# show term MANAGER { from {

```
source-address {
192.168.200.0/25;
destination-address {
100.100.100.1/32;
then {
forwarding-class expedited-forwarding;
accept;
term ALL-OTHER-TRAFFIC {
then accept;
[edit interfaces ge-0/0/1]
user@router# show
unit 0 {
family inet {
filter {
input COS-CLASSIFIER;
address 192.168.200.1/24;
}
```

- A. behavior aggregate
- B. policer
- C. multifield
- D. forwarding policy

Answer: C

QUESTION 316

Referring to the exhibit, which type of classifier is being used in this CoS configuration? [edit class-of-service]

```
user@router# show
interfaces {
ge-0/0/2 {
unit 0 {
classifiers {
inet-precedence default;
}
}
}
```

- A. behavior aggregate
- B. policer
- C. multifield
- D. forwarding policy

Answer: A

QUESTION 317

Given the routing entries shown in the exhibit, which next-hop IP address will be used for the destination IP address 192.168.1.142? (Assume that only static routes are available for the destination.)

```
user@router> show route protocol static
inet.0: 12 destinations, 12 routes (12 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
192.168.1.128/27 *[Static/5] 00:03:13
> to 10.20.106.10 via fe-0/0/5.106
192.168.1.144/29 *[Static/5] 00:03:13
> to 10.20.14.131 via ge-0/0/0.0
192.168.1.192/27 *[Static/5] 00:03:13
> to 10.18.1.1 via ge-0/0/1.0
192.168.1.128/28 *[Static/5] 00:01:06
> to 10.20.14.130 via ge-0/0/0.0
```

- A. 10.20.106.10
- B. 10.20.14.131
- C. 10.18.1.1
- D. 10.20.14.130

Answer: D

QUESTION 318

Using the routing table shown in the exhibit, what will be the next-hop IP address used for a destination IP address of 192.168.1.1? (Assume that the only routes to this destination are static routes.)

```
user@router> show route protocol static
inet.0: 12 destinations, 12 routes (12 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
192.168.1.0/24 *[Static/5] 00:03:13
> to 10.20.106.10 via fe-0/0/5.106
192.168.1.192/26 *[Static/5] 00:03:13
> to 10.20.14.131 via ge-0/0/0.0
192.168.1.192/27 *[Static/5] 00:03:13
> to 10.18.1.1 via ge-0/0/1.0
192.168.1.4/30 *[Static/5] 00:01:06
> to 10.20.14.130 via ge-0/0/0.0
```

- A. 10.20.14.130
- B. 10.18.1.1
- C. 10.20.14.131
- D. 10.20.106.10

Answer: D

QUESTION 319

Given the routing entries shown in the exhibit, which next-hop IP address will be used for the destination IP address 192.168.1.159? (Assume that only static routes are available for the destination.)

```
user@router> show route protocol static
inet.0: 12 destinations, 12 routes (12 active, 0 holddown, 0 hidden)
+ = Active Route, - = Last Active, * = Both
192.168.1.128/27 *[Static/5] 00:03:13
```

```
> to 10.20.106.10 via fe-0/0/5.106
192.168.1.144/29 *[Static/5] 00:03:13
> to 10.20.14.131 via ge-0/0/0.0
192.168.1.192/27 *[Static/5] 00:03:13
> to 10.18.1.1 via ge-0/0/1.0
192.168.1.128/28 *[Static/5] 00:01:06
> to 10.20.14.130 via ge-0/0/0.0
```

- A. 10.20.14.130
- B. 10.18.1.1
- C. 10.20.14.131
- D. 10.20.106.10

Answer: D

QUESTION 320

What are three examples of dynamic IGPs? (Choose three.)

- A. OSPF
- B. BGP
- C. IS-IS
- D. PIM
- E. RIP

Answer: ACE

QUESTION 321

Which three statements are true about terms in a policy? (Choose three.)

- A. The order of the terms in a policy is irrelevant.
- B. The action is specified in a then statement.
- C. Terms are optional in a policy.
- D. The match condition can be identified with a from statement.
- E. A from statement is mandatory in a term.

Answer: BCD

QUESTION 322

Which two statements are true about terms in a routing policy? (Choose two.)

- A. A routing policy cannot have more than one term.
- B. If a term does not contain a from statement, all routes match.
- C. If a term does not contain a from statement, the Junos OS will not commit.
- D. A then statement is not mandatory in a term.

Answer: BD

QUESTION 323

Which statement is true about terms in a policy?

- A. A single term can be applied to a protocol or interface, independent of the policy.
- B. Once configured, terms within a policy cannot be reordered.

- C. The name of a term is limited to five characters.
- D. A from statement is optional in a term.

Answer: D

QUESTION 324

Which command is a valid way to view the status of an interface?

```
A. > show interfaces fe-0/0/0 extensive B. > show interfaces fe-0/0/0 status C. > show interfaces fe-0/0/0 health-info D. > show interfaces fe-0/0/0 verbose
```

Answer: A Explanation:

You can get the information from "show interface <interface_name> extensive" https://forums.juniper.net/t5/Ethernet-Switching/Any-Command-like-as-cisco-s-quotshow-interface-status-quot/td-p/4596

QUESTION 325

Given the host IP address of 192.168.100.60 and a network mask of 255.255.255.224 (or /27), which address represents the correct network address for the referenced host?

```
A. 192.168.100.48B. 192.168.100.16C. 192.168.100.0D. 192.168.100.32
```

Answer: D Explanation:

Network is a class C network: 192.168.100.32/27. Binary: 11000000.10101000.01100100.00100000. http://jodies.de/ipcalc?host=192.168.100.60&mask1=27&mask2=

QUESTION 326

Referring to the exhibit, which three networks match the policy? (Choose three.)

```
[edit policy-options policy-statement my-policy]
user@router# show
term 1 {
from {
  route-filter 192.168.0.0/16 prefix-length-range /20-/24;
  }
then accept;
}
```

- A. 192.168.0.0/20
- B. 192.168.0.0/16
- C. 192.168.128.0/18
- D. 192.168.128.0/21
- E. 192.168.64.0/24

Answer: ADE

QUESTION 327

Referring to the exhibit, you must move the match term above the reject term.

```
[edit policy-options policy-statement my-policy]
user@router# show
term reject {
  then reject;
}
term match {
  from {
  protocolbgp;
  route-filter 10.10.10.0/24 exact;
}
}
```

Which command would accomplish this task?

- A. set term match from policy reject
- B. up 1 copy policy-statement my-policy term match to term before-reject
- C. activate term match to policy
- D. insert term match before term reject

Answer: D

QUESTION 328

Which command produces the output shown in the exhibit?

Time	Filter	Action	Interface	Protocol	Src Addr	Dest Addr
14:52:51	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:51	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:46	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:46	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:46	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:46	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:52:46	select-telnet	A	local	TCP	192.168.10.1	192.168.209.2
14:41:41	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:41	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:36	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:36	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:36	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:36	pfe	A	local	TCP	192.168.10.1	192.168.209.2
14:41:36	pfe	A	local	TCP	192.168.10.1	192.168.209.2

- A. show firewall counter telnet-counter filter select-telnet
- B. show firewall log
- C. show log messages
- D. show services accounting usage

Answer: B

QUESTION 329

Which two statements are true about firewall filter configurations? (Choose two.)

- A. Multiple action modifiers can be included in the same term.
- B. Only a single action modifier can be included in the same term.
- C. The default term within a firewall filter uses the discard action.
- D. The default term within a firewall filter uses the reject action.

Answer: AC

QUESTION 330

Which two statements are true about firewall filter configurations? (Choose two.)

- A. Multiple action modifiers can be included in the same term.
- B. Only a single action modifier can be included in the same term.
- C. If an action modifier exists without a terminating action, matching packets will be accepted.
- D. If an action modifier exists without a terminating action, matching packets will be discarded.

Answer: AC

QUESTION 331

You have configured a firewall filter with a single term matching on packets with a source address in the 10.0.0.0/24 subnet. This term only includes the count action. Which two statements are true about traffic evaluated by this firewall filter? (Choose two.)

- A. Packets outside the 10.0.0.0/24 subnet will be accepted.
- B. Packets outside the 10.0.0.0/24 subnet will be rejected.
- C. Packets outside the 10.0.0.0/24 subnet will be counted.
- D. Packets outside the 10.0.0.0/24 subnet will not be counted.

Answer: BD

QUESTION 332

The IP address 192.168.100.1 belongs to which class of IP address space?

- A. Class A
- B. Class B
- C. Class C
- D. Class D

Answer: C

QUESTION 333

Which command configures an address of 192.168.1.1 with a mask of 255.255.255.0 on interface qe-0/0/0?

- A. set ip interface ge-0/0/0 address 192.168.1.1 255.255.255.0
- B. set ip interface ge-0/0/0 address 192.168.1.1/24
- C. set interface ge-0/0/0 ip4 address 192.168.1.1 mask 255.255.255.0
- D. set interfaces ge-0/0/0 unit 0 family inet address 192.168.1.1/24

Answer: D Explanation:

http://www.juniper.net/documentation/en_US/junos12.3/topics/example/interfacesconfiguring-fast-ethernet-interfaces.html

QUESTION 334

Which two protocols are connection-oriented? (Choose two.)

- A. Ethernet
- B. PPP
- C. TCP
- D. UDP

Answer: BC **Explanation:**

http://searchnetworking.techtarget.com/definition/connection-oriented

QUESTION 335

Which statement is correct about the validate option when upgrading JUNOS software?

- A. It will check the MD5 checksum of the install package.
- B. It will check if the device meets the memory requirements for the install package.
- C. It will check the compatibility of the configuration with the install package.
- D. It will check if the device meets the storage requirement for the install package.

Answer: C Explanation:

When you upgrade or downgrade Junos OS, we recommend that you include the validate option with the request system software add command to check that the candidate software is compatible with the current configuration. By default, when you add a package with a different release number, the validation check is done automatically.

https://www.juniper.net/techpubs/en_US/junos12.3/topics/task/operational/junoscandidate-software-compatibility-verifying.html

QUESTION 336

What are three advantages which dynamic routing protocols offer over static routing protocols? (Choose three.)

- A. lower administrative overhead
- B. increased network availability
- C. greater network scalability
- D. easier to implement qualified next hops
- E. easier ECMP route implementation

Answer: ABC Explanation:

Dynamic routing protocols help the network administrator manage the time-consuming and exacting process of configuring and maintaining static routes. Dynamic routing automatically adapts topology to reroute traffic if possible. Dynamic routing is generally independent of the network size.

http://www.ciscopress.com/articles/article.asp?p=2180210&seqNum=5

QUESTION 337

When troubleshooting ATM, which command would allow you to test reachability from one side of an ATM cloud to the other?

A. ping atm vci 0.100 interface at-0/1/0 end-to-end
B. ping atm vci 0.100 interface at-0/1/0 circuit
C. ping atm vci 0.100 interface at-0/1/0 far-end
D. ping atm vci 0.100 interface at-0/1/0 final-hop

Answer: A **Explanation:**

http://www.juniper.net/documentation/en_US/junos13.3/topics/reference/commandsummary/ping-atm.html

QUESTION 338

Which command will display the temperature of the Routing Engine's CPU?

```
A. show chassis environmentB. show chassis routing-engineC. show chassis temperaturesD. show chassis status
```

Answer: B Explanation:

https://www.juniper.net/documentation/en_US/junos11.4/topics/reference/commandsummary/show-chassis-routing-engine.html

QUESTION 339

Which commnand would correctly define a router's host-name?

```
A. # set ip host-name <name>
B. > set ip host-name <name>
C. # set system host-name <name>
D. > set system host-name <name>
```

Answer: C **Explanation:**

http://www.juniper.net/techpubs/en_US/junos15.1/topics/example/router-namedomain-name-ip-address-system-id-configuring.html

QUESTION 340

You have been asked to use a 28 bit subnet mask to segment the following network block: 108.12.5.0. How many usable hosts per sub-net could you create?

A. 10 hostsB. 14 hostsC. 12 hostsD. 16 hosts

Answer: B Explanation:

Network: 108.12.5.0/28 (Class A)

Broadcast: 108.12.5.15 HostMin: 108.12.5.1 HostMax: 108.12.5.14 Hosts/Net: 14

http://jodies.de/ipcalc?host=108.12.5.0&mask1=28&mask2=

QUESTION 341

In Ethernet networks, duplex mismatches will lower performance. Which error statistics can be seen if a duplex mismatch is present?

- A. collisions on the full-duplex side; runts on the half-duplex side
- B. collisions on the full-duplex side; collisions on the half-duplex side
- C. collisions on the half-duplex side; framing errors on the full-duplex side
- D. collisions on the half-duplex side; giants on the full-duplex side

Answer: C Explanation:

On an Ethernet connection, a duplex mismatch is a condition where two connected devices operate in different duplex modes, that is, one operates in half duplex while the other one operates in full duplex. This results in the full-duplex side receiving an incomplete frame with CRC error or a runt frame. It does not detect any collision since CSMA/CD is disabled on the full-duplex side. As a result, when both devices are attempting to transmit at (nearly) the same time, the packet sent by the fullduplex end will be discarded and lost due to an assumed collision and the packet sent by the half duplex device will be delayed or lost due to a CRC error in the frame. https://en.wikipedia.org/wiki/Duplex mismatch

QUESTION 342

What is correct regarding the configuration shown below?

```
static route 0.0.0.0/0 qualified-next-hop 172.30.25.1 preference 7 next-hop 172.30.25.5
```

- A. The next-hop 172.30.25.1 is selected because the address has the lowest value.
- B. The next-hop 172.30.25.1 is selected because it is listed first.
- C. The next-hop 172.30.25.1 is selected because it is the lowest protocol preference.
- D. The next-hop 172.30.25.5 is selected because it is the lowest protocol preference.

Answer: D

QUESTION 343

After issuing the show interfaces terse command, you notice that the status of one interface is "up down". What does this indicate?

- A. Layer 1 on the interface is up but Layer 2 is down.
- B. Layer 2 on the interface is up but Layer 3 has not been configured.
- C. The interface is administratively up but the link status is down.
- D. The interface is up but has been administratively turned off.

Answer: C **Explanation:**

http://www.juniper.net/documentation/en_US/junos15.1/topics/task/verification/t1status-displaying.html

QUESTION 344

Which command would initiate a loopback on a Gigabit Ethernet interface ge-0/0/0?

- A. # set interfaces ge-0/0/0 unit 0 loopback
- B. # set interfaces ge-0/0/0 gigether-options loopback
- C. > set interfaces ge-0/0/0 loopback
- D. > loopback ge-0/0/0

Answer: B

QUESTION 345

What represents the decimal equivalence of 10101100 00011111 11001001 11000101?

- A. 172.28.187.189
- B. 172.31.201.197
- C. 172.30.231.182
- D. 172.19.151.107

Answer: B

QUESTION 346

Which command would allow you to compare two files stored on your router?

- A. user@host> file show filename1 compare filename2
- B. user@host> file compare files filename1 filename2
- C. user@host> compare files filename1 filename2
- D. user@host> compare filename1 filename2

Answer: B

QUESTION 347

You are configuring a firewall filter. Which "from" criterion would match only those packets destined for 10.10.10.1?

- A. [edit firewall filter test]
- root@router# set term 1 from address 10.10.10.1
 B. [edit firewall filter test]
- root@router# set term 1 from destination-address 10.10.10.1
- C. [edit firewall filter test]
 root@router# set term 1 from destination 10.10.10.1
- D. [edit firewall filter test]
 root@router# set term 1 from ip-prefix 10.10.10.1

Answer: B

QUESTION 348

What is the default local location for syslog and trace files?

- A. /log
- B. /home/log
- C. /var/log
- D. /etc/log

Answer: C

QUESTION 349

A router has been configured with the settings shown below:

```
[edit]
user@host# show system authentication-order
authentication-order [ radius tacplus ];
```

The router also has a local database that contains the user lab with password lab123. Suppose a user enters the username lab and the password lab123. What would happen if both the RADIUS and the TACACS servers are not accessible?

- A. The user lab will not be able to login.
- B. The user lab will be authenticated against the local database and will be able to login.
- C. The user lab will receive an error message indicating the router is unable to authenticate due to the authentication servers not responding.
- D. The user will be able to login only if tries to login as the root user.

Answer: B

QUESTION 350

Which type of routes are held in inet.0?

- A. multicast and unicast IPv4 routes
- B. ARP tables and MAC reachability
- C. IP version 4 unicast routes
- D. IP version 6 and IP version 4 routes

Answer: C

QUESTION 351

Which naming convention is used by Juniper Routers when archiving their configurations to a remote server?

- A. yyyymmdd_HHMMSS_host-name_juniper.conf.gz
- B. host-name juniper.conf.gz yyyymmdd HHMMSS
- C. yyyymmdd_HHMMSS_host-name_juniper.conf
- D. host-name_juniper.conf_yyyymmdd_HHMMSS
